

into its maw (Ref save DC 24 to resist), imprinting them on the page. A *Resurrection* spell, *Wish*, or *Miracle* can restore the deceased. Unlike most of these monsters, the Page Demon isn't very dangerous to powerful player characters, but it can anger them or hinder them (by screwing with scrolls, books, and so on), and so interest the party in killing it.

How to win. The Page Demon exists on a level mortal beings can't comprehend. Killing it would involve erasing that dimension in one of two ways: destroying all written words and/or paper on the plane (guaranteed not to be popular) or entering its realm and hunting it out. Since it doesn't have a 3-dimensional form, would be visitors must transform themselves into 2-dimensional beings or cast a spell to temporarily translate information from that two-dimensional world for them. Either is likely to involve considerable magical power. Once inside, it has the stats of a Hunefer or any other big, scary creature you want to use.

The Worm-Thing

Similar to a *Worm that Walks*, only much, much worse, the Worm-Thing attempts to become the last word in survival. Its body is made of a roiling mass of Worms or it may take any other shape (given that these

are high-level spellcasters by definition, they can easily transform). As it happens, it can also take over a vast number of creatures by attacking them with its worms. The worms attack and take over the host; the Worm-Thing can control them (there's a reason we don't bother with a save – see below). Even better, if even a single worm survives, so does the Worm-Thing. They usually also lock up several spare bodies in protected pocket dimension stasis cocoons, several in other planes, and have a few stashed around for general use.

How to win. As it happens, killing the Worm-Thing is almost impossible. It can be done by getting every last worm in every dimension and safe house. That isn't likely. Fortunately, the Worm-Thing has one weakness: it's too reasonable. While inhuman, it has no reason to hurt anyone. Becoming a weird monster has the unusual effect of making them simply apathetic. Worm-Things don't care about ruling or leading hordes of darkness. They might become mercenaries for other powerful beings because it pays well and there are some things more easily bought than found or taken. They don't usually bother to take over sentient beings' forms. Why would they, when taking over a large, dumb beast and transforming it into a more useful shape is so much easier and safer? They don't worry about food, shelter, or clothing. They're just nigh-impossible to kill.

Appendix 1: Chakra

Players usually don't need to worry about Chakra; they're simply an example of an in-game reason to limit certain combinations or quantities of powers.

In classic mysticism the seven great chakra are the major life-force nexi of the mind, spirit, and body, the energy centers which power and bind together the entire assembly. Fantasy biologists see them as major neural connections, and thus as primary centers of bioelectrical activity.

In game terms Chakra are balance points for mystic energies; the locations where external sources of power may be safely bound to someone's essence on a permanent basis. Trying to do it elsewhere will create severe imbalances, leading to madness, bizarre physical distortions, or even death. Trying to link two differing sources of power to a single chakra is likely to produce similar results, since they will essentially be short-circuited through the character's mind, body and spirit or forced together on the same wavelength.

In practical terms, this means that there is an upper limit to the number of power sources any one character can tap, and on their types; some chakra are suitable for particular power sources and some are not. This is why, for example, a character can be a either were-wolf or a were-tiger (or any other were-creature) but not both; the relevant chakra can only be linked to a single one of the two totems. The basic seven Chakra are:

Muladhara rests at the base of the spine. It's linked with earth, survival, physical health, prosperity, and strength. This primal chakra, present in every multicellular organism, also relates to shamanistic and "Hoarding" magic. Lycanthropy results when a character is linked to a totem through this chakra.

Svadhithana swirls in the lower abdomen. It's associated with water, emotions, sexuality, growth, Charisma, and transformation, and is tied to the Dragon Path.

Manipura burns in the solar plexus. It's associated with fire, psychic energy, vitality, Constitution, strength of purpose, and action. It fuels Psychic abilities.

Anahata breathes in the heart. Associated with air, balance, relationships, and dexterity, it's the only active chakra in mindless undead, and is linked with Dweomer, Thaumaturgy and Divine Magic.

Visshudha throbs in the throat. It's associated with communication, creativity, manipulation, and self-expression. It's also associated with Mana, and so expresses the bond between magic, names, speech, and language. The psychic aspects of Charisma, as well as

Theurgy and Arcane magic, and the way of the Mystic Artist, are tied to this chakra.

Ajna peers out from the brow. This "third eye" is associated with perception, imagination, illusion, intuition, light, and darkness. The intellect, in both knowledge and ignorance, flows from it, as does Channeling.

Sahasrara bathes everything in light at the crown at the top of the head. Associated with awareness, Wisdom, cosmic consciousness, and the astral plane, this chakra control's the user's Dominion.

Gods, Spirits, and a few epic heroes have two additional Chakra:

Kihadhara. The Celestial Chakra usually drifts just above the head, extending tendrils of light to surround the possessor. A manifestation of a link between the possessor and the abstract realms of the deeper astral, it is associated with spheres of influence, synchronicity, immortality, and the creation of new realms. In traditional theory, full development of Kihadhara offers unity with the cosmic all. It governs the use of Godfire.

Bindhudharma. The Anchoring Chakra floats just below the feet, with its whirls also surrounding the possessor. It's a manifestation of the possessor's bond with the material world, whether through some relic, emotional tie, magical effect, or dedicated worshipers. Associated with manifestation and channeling power to others, it also promotes preservation, order, and stability.

Chakra are usually more or less self-contained; their energies interact with those of other living beings and fuel an entity's personal talents. The seven common chakra are not linked by default to any other source of power.

Once opened, a difficult and sometimes dangerous process, each Chakra can be bonded to or infused with one other source of power over and above the character's personal energy sources. Common power sources include:

Enchanted and Psychically-imbued items. These may be Absorbed (Innate Enchantment), Linked (Mystic Link), or Bonded (symbiotic or parasitic items). Those using Mystic Links can partially get around the "one-power-source-per-chakra" limitation by binding together many items as a single "horde" - but such hordes are tempting targets. Sets of more mundane items linked psychologically or via some minor common charm, are also manageable.

Power-Dimensions and Nexi. Stonehenge, "Elemental Planes," Ley Line Nexi, and sometimes even sources of physical energies fall into this category. It is

wise to have a selection of “channels” ready to direct such forces into. User should beware of overloads when tapping into such near-limitless sources. The typical user will gain a variety of innate talents, but will also suffer from a severe vulnerability to opposing forces.

Runes, Domains, Paths, and Spheres. These resemble Power Dimensions and Nexi at first glance, but have less defined “locations” and, as philosophical entities, are more subject to the user’s will. Overload is not a problem, but the mental effects can be severe. Characters drawing on the same runes will always be at least subliminally in contact, and some foes may be able to use this as a weakness. Divine spheres are even more dangerous; they greatly influence their users. Those who claim a sphere must either rigidly stress their differences, fight constantly, or risk drowning themselves in a common conceptual reality, forgetting where it stops and they begin. Paths and Domains are far more limited and far safer.

Beings, Familiars, and Spirits. In general, these only work smoothly if one of the entities involved is firmly in control of the energy flows. Subsumption - incorporating other spirits into your Chakra - is an easy shortcut to great power, but has severe mental side effects. Pacts allow the user to tap into a portion of the power of some mighty entity, but there’s usually a price. Either the entity will charge for the access in some way, or the character must take great pains to maintain the link. Examples include priestly orders, totem magic or lycanthropy (the distinction depends on who’s in control), and familiars (minor entities which draw extra power from you).

Energy Storage. Opened, but unbonded, Chakra can be used to simply store power, either raw, in the form of Mana, Psi-Energy, spell levels or purely physical energies, or in the far more stable and thus more readily stored and controlled forms of preset effects. In general, the power which can be stored in any single chakra this way is related to its level of development as measured by the related attribute.

Chakra usually hold positive aspects, their energies devoted to growth, expansion, achievement, and the development of life. They can be negatively oriented (although this is rare among playable species) directed towards the destruction of the qualities they normally enhance. If the balance of a character’s chakra runs too strongly towards the negative he or she may come to embody the entropic energies of the universe - falling into undeath or becoming a demon. Similarly, sufficient focus on, and development of, positive aspects can raise a character into the ranks of the celestials or pure spirits.

In theory Chakra should all be developed at the same time, opened in sequence along the spine, and be correctly balanced so as to finally flower into the

Kihadhara and Bhindudharma chakra simultaneously for a harmonious ascension into the higher realms.

Like most other ideal paths of self-development this hardly ever occurs. Unbalanced development can, at least in theory, cause various psychological and even physiological imbalances or ailments. In practice, such effects are generally so mixed with environmental, genetic, and personal factors as to be indistinguishable.

Note that lacking a chakra does not (necessarily) indicate that a creature cannot have any of the related abilities; it simply means that they are either quite weak or not self-generating.

Mindless Plants have only the Muladhara chakra. It’s normally in positive mode, save for fungi and other parasitic species. Certain animals, such as sponges, also fall into this category. While their struggles are slower than those of animals, plants battle with a ruthlessness unheard of in animals. Plants face a constant contest for survival. They know neither rest nor peace, so while their bodies may work without haste, on that scale of time they fight with all their might. Only in a few locations well regulated by higher powers do they grow unmarred.

Sentient plants have the Muladhara, Manipura, and Ajna chakra. They tend to be a bit uninterested in higher forces, somewhat unemotional, and ruthless when dealing with animal creatures - but are less so than their primal relatives. Many recognize concepts such as offspring and have families, though they still care little for the world outside their chosen home.

Nonsentient animals lack the Ajna and Sahasrara chakra. Of course, equipped with effective instincts and senses, they quite arguably have little need of them.

Sentient animals (*i.e.*, people) have all seven of the major chakra, although as always, they may be more or less developed in any given case. Actually developing chakra and their associated powers will usually take a good deal of time, effort, and CP.

Mindless undead have only the Anahata chakra in the negative mode. This is why they tend to attack old friends and kin in preference to other targets when uncontrolled, and are so vulnerable to divine magic.

Sentient undead lack two Chakra, Svadhisthana and Sahasrara. Even at their best, undead tend to be lacking in true wisdom, uncharismatic, and detached. Generally all their chakra will all be in negative modes. Undead have been known to bypass this lack and reach godhood - but this is extremely rare. Most undead gods achieved godhood first, enabling them to retain all chakra regardless of their physical form’s status.

Gods normally have all nine of the great chakra, although there are occasional exceptions. This is why even the greatest of gods may not have more than nine spheres and rarely more than seven since the Kihadhara and Bindhudharma Chakra are inactive (or more accurately, enveloped) when the character is in the related deeper astral realm.

Spirits may have various combinations of Chakra, but usually have all nine when active within the material plane. Elemental beings usually have substantial weakness associated with opposing elemental chakra.

Magical theorists note a correspondence between the six higher chakra and Theurgy's six magical verbs: Svadhisthana/Transform, Manipura/Destroy, Anahata/Control, Sahasrara/Heal, Visshudha/Create, and Ajna/Perceive. A true master of the chakra should - at least theoretically - be able to draw vast power from the upper astral thru the Kihadhara chakra, focus and transform it through the seven basic chakra and release it into the world through the Bindudharma chakra. Unfortunately, or perhaps fortunately, such a transcendent Kundalini state "risks" (offers?) true unity with the higher realms and the consequent inability to return to the normal world.

For reference purposes the following feats usually require bonding to one of the user's Chakra: Blessing, Companion (when mystically linked to the owner), Domain/Path (other than those provided by another entity), certain variants of Eldritch, Innate Enchantment (Absorption), Invocation (unless accomplished by calling

on an entity which consciously decides whether or not to respond), Karma (at GMO), Mystic Link (Spell/Power links and up), Dominion/Godfire, Rite of C'hi (if taken with bonus uses), Channeling, and the Dragon Path (Eye or Pulse of the Dragon). Thus, each of these abilities (but not necessarily individual feats) takes up an available slot. Shamanism, Lycanthropy, and Priestcraft usually require one as well. Thus, characters have some limits on the special powers they may take, even in the wildest games.

Theoretically, one might be able to eliminate Chakra bindings and free them up again (also freeing up the CP spent on those abilities). No, we don't have a specific way to do this. It would take a lot of power, access to the most puissant lore, and a lot of finesse to accomplish. A greater, nearly transcendent being might be able to do it for someone else, and some forms of

personal transformation might succeed. For an example of the latter, it might be possible for a deity to leave behind the immortal power of the spheres to a successor and live out a quiet life somewhere else.

Appendix 2: Class Breakdowns

Standard Character Classes

Note that the following class breakdowns are based on Level 20 characters. The standard 3.0 and 3.5 classes assign a disproportionate quantity of abilities and skills to the first few levels. While this effectively assigns starting characters well-defined roles within a group, and partially compensates for the inherent penalties of multiclassing (seriously delayed access to powerful high-level abilities), it has the peculiar effect of allowing characters to instantly master large blocks of skills. Equally important, characters abruptly cease to improve abilities which they constantly use.

Point-based characters don't gain this edge. They're a bit weaker to start with and, since multiclassing is meaningless for them, can't pick up large blocks of new abilities quite so readily. On the other hand, they can acquire whichever abilities suit their conception and won't give up on advancing older "class" abilities to acquire new ones unless they choose to.

Also note that these classes have a base of 504 CP for the whole 20 levels. This includes level 0, giving them an extra 24 points. Later entries for Prestige Class breakdowns don't include level 0, for obvious reasons, and only go to level 10.

Where it might be confusing, we have added small notes in parentheses to mention specifically what the ability used to be called. Other notes in parentheses mention which upgrades an ability has (the + sign) and the CP cost. Abilities taken multiple times are noted with Roman numerals.

Barbarian Class Descriptions

The Barbarian, a brutal warrior from outside the civilized world, fights with fearsome passion. Destroying enemies with the savage glee of a raging combatant, the barbarian specializes in toe-to-toe combat. Barbarians learn the ways of the world on a practical level, eschewing glamour and superficial objects.

(3.0)

Available 504 CP (Base) +2 (Illiterate) = 506 CP

Hit Die: 20d12 (160 CP)

Saves: +24 (72 CP)

Warcraft: +20 (120 CP)

Abilities: (37 CP) - Berserker (12 CP), Celerity (6 CP), Awareness (*Uncanny Dodge*, with Danger Sense II, Danger Sense Corrupted to +4 bonus only, 10 CP), Damage Reduction 4/- (9 CP)

Proficiencies: Simple and Martial Weapons, Light and Medium Armor, and Shields (21 CP)

Skills: 92 skill points (92 CP)

Total: 502 CP out of 506 CP

The 3.0 Barbarian's damage reduction seemed to be unrestricted, at least until the DMG came out. It's been purchased that way here. The Illiteracy appears to be irrelevant, as might be expected since it automatically disappeared if and when the character multiclassed.

(3.5)

Available 504 CP (Base) +2 (Illiterate) = 506 CP

Hit Die: 20d12 (160 CP)

Saves: +24 (72 CP)

Warcraft: +20 (120 CP)

Abilities: (39 CP) - Berserker (15 CP), Celerity (6 CP), Awareness (*Uncanny Dodge*, +Danger Sense II, 12 CP), Damage Reduction 5/- (Specialized versus physical, 6 CP)

Proficiencies: Simple and Martial Weapons, Light and Medium Armor, and Shields (21 CP)

Skills: 92 skill points (92 CP)

Total: 504 CP out of 506 CP

*So I like shish-kabobed Ork.
What's wrong with that?*

Bard Class Description (3.0 & 3.5)

The Bard, a mystically skilled song-farer, travels about the world in search of new knowledge and art. Able to penetrate the deepest mysteries and sing praises of the heroes he or she travels with, the Bard lives today to write the legends of tomorrow.

(3.0 & 3.5)

Available 504 CP (Base)

Hit Die: 20d6 (40 CP)

Saves: +30 (90 CP)

Warcraft: +15 (90 CP)

Magic Levels: 20 Bard (160 CP or 120 CP with the 3.5 Noncombative limitation)

Abilities: (12 CP) - Mystic Artist (6 CP), Lore (*Bardic Lore*, 6 CP)

Proficiencies: Weapon and Armor (18 CP)

Skills: (3.0) 92 skill points (92 CP)

(3.5) 132 SP (132 CP)

Total: 502 CP out of 504 CP

Bards need the Mystic Artist rules in play to use all of their abilities in either 3.0 or 3.5. The 3.5 Bard gets a few additional Bardic Music (Mystic Artist) effects, but that list has been expanded considerably anyway.

Cleric Class Description (3.0 & 3.5)

Steeped in the mysteries of the Gods, a Cleric worships divine or supernatural forces, calling upon their aid in time of need. While many priests tend the temples and shrines dedicated to their god or pantheon, the adventurer Cleric prefers a more direct approach to furthering the demands of his or her faith. Secure in the knowledge of his or her deity's power, the Cleric walks the earth with a fearsome faith.

(3.0 & 3.5)

Available 504 CP (Base) + 40 (Duties) = 544 CP

Hit Die: 20d8 (80 CP)

Saves: +30 (90 CP)

Warcraft: +15 (90 CP)

Magic Levels: 10 Cleric Package (200 CP)

Abilities: (15 CP) - Turn/Rebuke Undead (3 + Cha Mod times per day at +4 on chart, 15 CP)

Proficiencies: Weapon and Armor (21 CP)

Skills: 46 skill points (46 CP)

Total: 542 CP out of 544 CP

Clerics probably ought to learn something about their god on a mandatory, rather than optional, basis. Spending those last 2 CP on one rank in Knowledge: Religion with a specialization in their deity would be nice. On the other hand, d20 religions are much more businesslike than real ones.

Druid Class Descriptions

Guardian of nature and the things that dwell within it, Druids protect the earth from major menaces. While not always openly hostile to cities and towns – for life dwells there, too – the Druid rarely feels comfortable in a crowded metropolis. The elements hear and obey his or her call, and the Druid readily wields the magic of the earth in battle.

(3.0)

Available 504 CP (Base) + 80 (Duties and Armor and Weapons restrictions) = 584 CP

Hit Die: 20d8 (80 CP)

Saves: +30 (90 CP)

Warcraft: +15 (90 CP)

Magic Levels: 20 Druid (160 CP)

Abilities: (48 CP) - Occult Sense (*Nature Sense*, 6 CP), Travel (Forest, 3 CP), Traceless (Travel, Specialized: natural surroundings only, 3 CP), Resistance (+4 on Saves versus Fey, 6 CP), Shapeshifting (21 CP), Immunity (Poison, Corrupted to natural poisons only, 6 CP), and Timeless Body (3 CP or free depending on the campaign)

Proficiencies: Weapon and Armor (21 CP)

Skills: 92 skill points +1 Language (93 CP)

Total: 579 or 582 CP out of 584 CP

(3.5)

Available 504 CP (Base) + 80 (Duties and Armor and Weapons restrictions) = 584 CP

Hit Die: 20d8 (80 CP)

Saves: +30 (90 CP)

Warcraft: +15 (90 CP)

Magic Levels: 20 Druid (160 CP)

Abilities: (57 CP) - Companion (6 CP), Lore (Animals, Specialized only to understand how to get along with them, *Wild Empathy*, 3 CP), Skill Focus II (*Nature Sense*, 6 CP), Travel (Forest, 3 CP), Traceless (Travel, Specialized: natural surroundings only, 3 CP), Resist (+4 on Saves versus Fey, 6 CP), Shapeshifting (21 CP), Spell Conversion (*Summon Nature's Ally*, 6 CP), Timeless Body (Resistance to Age, 3 CP or free depending on the campaign)

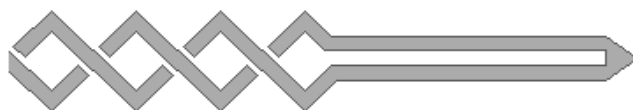

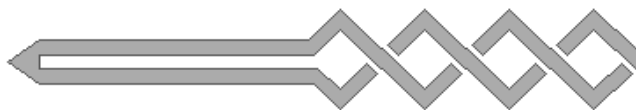

Proficiencies: Weapon and Armor (21 CP)

Skills: 92 skill points +1 Language (93 CP)

Total: 588 or 591 CP out of 584 CP

In many ways the Druid is the generalist among the basic classes. They're fairly good in a fight, have decent (but not overwhelming) offensive and healing spells, have a fair number of skill points, and have a few useful special abilities - but not too many. Unfortunately, being fair at many things costs more than being tremendously good at one.

If you have enough Diplomacy you don't really need Wild Empathy. There's a large penalty for the lack of a common tongue and another for dealing with creatures with radically different minds, but there are other talents and spells for dealing with that.

Fighter Class Description (3.0 & 3.5)

Master of battle, the Fighter knows every trick in the book and probably wrote a few others into it. Likely able to defeat any other character at his or her preferred range, the Fighter studies a dozen styles and techniques for killing quickly and efficiently.

(3.0 & 3.5)

Available 504 CP (Base)

Hit Die: 20d10 (120 CP)

Saves: +24 (72 CP)

Warcraft: +20 (120 CP)

Abilities: (66 CP) - Bonus Feat XI (66 CP)

Proficiencies: Weapon and Armor (27 CP)

Skills: 46 skill points (46 CP)

Total: 451 CP out of 504 CP

By this calculation the Fighter is somewhat underpowered. This is true. While they are the best of the standard classes at small scale combat, they aren't all that much better than some of the others (especially if enhancing magic is used), and they are much less flexible. They appear equal simply because most games spend a great deal of time on small scale combat. Those extra points are best spent giving them some non-combat skills and abilities to work with, just in case the GM leans towards intrigue scenarios or otherwise mostly non-combative adventures.

Monk Class Descriptions

(3.0)

Available 504 CP (Base)

Hit Die: 20d8 (80 CP)

Saves: +36 (108 CP)

Warcraft: +15 (90 CP)

Abilities: (138 CP) – Martial Arts V (21 CP), Trick (Stunning Blow, 4 CP*), Improved Fortune (*Improved Evasion*, 8 CP*), Improved Trip (2 CP*), Block (Missile Weapons, 6 CP), Celerity 6 (14 CP*), Augmented Bonus (Improved, Wis to AC, 8 CP*), Defender (4 CP*), Immunity (Poison 9 CP, Falling 4* CP, Disease, 6 CP), Enhanced Leap (no normal limit, 2 CP*), Healing Touch (Specialized, self only, 2 CP^), Spell Resistance (Level+10, 8^), Bonus Attack (*Flurry of Blows*, 6 CP) Resist (*Still Mind*, +2 on saves versus Enchantment, 3 CP), Rapid Attack 2 (Unarmed Only, 6 CP), Imbuement (unarmed version, 6 CP), Inherent Spells (*Dimension Door*, *Etherealness*, and *Quivering Palm*, 10* CP),

Mindsight (*Gift of Tongues*, 6 CP), Timeless Body (*Perfect Self*, +Transcendence, 6 or 9 CP depending on the setting)

Proficiencies: Weapon (6 CP)

Skills: 92 skill points (92 CP)

Total: 516 out of 504 CP

Representing the “no multiclassing” rule in point-buy is difficult. The best way to do it - and incidentally the best way to bring down the CP cost a bit - is to buy Fast Learner Specialized so that it only works as long as the character continues with a rigid, preset, program of self development. We don't really recommend bothering though. That rule always seemed pointless anyway.

(*) “Corrupted.” These abilities are not usable while wearing armor.

(^) “Corrupted.” These abilities suffer from "armor failure percentages" as per arcane spellcasting.

Note that the 3.0 Improved Trip (and similar Feats) only cost 3 CP. The 3.5 version adds additional abilities as shown in the feat conversion appendix.

(3.5)

Available 504 CP (Base)

Hit Die: 20d8 (80 CP)

Saves: +36 (108 CP)

Warcraft: +15 (90 CP)

Abilities: (142 CP) – Martial Arts V (21 CP), Improved Fortune (*Improved Evasion*, 8 CP*), Celerity VI (14 CP*), Augmented Bonus (Improved, Wis to AC, 8 CP*), Defender (4 CP*), Immunity (Poison 9 CP, Falling 4* CP, Disease, 6 CP), Healing Touch (Specialized, self only, 2 CP^), Spell Resistance (Level+10, 8 CP^), Resist (+2 saves vrs Enchantment, 3 CP), Imbuement (unarmed version, spent on Lawful [+2], Magic [free with Lawful], and Adamantine, 6 CP), Inherent Spell (*Etherealness*, *Dimension Door*, *Quivering Palm*, 10* CP), Mindspeech (All living creatures, Specialized must actually speak, 6 CP), Timeless Body (*Perfect Self*, +Transcendence, 3 CP), “Flurry of Blows” (2x Bonus Attack 8 CP*, +4 Warcraft, Specialized [only to make up for Flurry penalties], Corrupted*, 8 CP*). **Optional Ability Sets:** Trick (Stunning Blow, 4 CP*) OR Improved Grapple (4 CP*), Improved Trip (4 CP*) OR Improved Disarm (4 CP*), and Block (Missile Weapons, 6 CP*) OR Reflex Training (Combat Reflexes, 6 CP).

Proficiencies: Weapon (6 CP)

Skills: 92 skill points (92 CP)

Total: 518 CP, 502 with Fast Learner, out of 504 CP

(*) “Corrupted.” These abilities are not usable while wearing armor, using a shield, or carrying a medium or heavy load.

(^) “Corrupted.” These abilities suffer from "armor failure percentages" as per arcane spellcasting.

The 3.0 monk had a great many abilities which were not usable while wearing armor or suffered arcane failure when wearing armor. The 3.5 monk does not have such a restriction listed on a few of those abilities. We're retaining it anyway, since (a) it seems to fit, and (b) no one in their right mind will take a bunch of levels of monk and then negate the remaining abilities which are listed that way. Improved Disarm and Trip has improved since 3.0, adding Specialist. Personally, we'd have assigned them either some duties - on the theory that you have to go back and look for more advanced training - or Fast Learner (Martial Arts) to represent their being a "natural" who doesn't really need training. With Fast Learner there's a net "profit" of 14 points, bringing the 3.5 monk down to 506 CP out of 504.

Warcraft: +20 (120 CP)

Magic Levels: 17 Paladin (34 CP) + 10 Specialized Caster Levels (30 CP)

Abilities: (84 CP) - Occult Sense (*Detect Evil*, 6 CP), Immunity (Disease, Fear, 12 CP), Augmented Bonus III (*Divine Grace*, Specialized; only while truly good and pure in faith, 18 CP), Smite (+Bonus Uses, 12 CP), Turn Undead (3 + Cha Mod times per day at +2, 12 CP), Presence (*Aura of Courage*, 6 CP), Healing Touch (with *Remove Disease*, 12 CP), Innate Spell (*Summon Mount*, +4 bonus uses, Specialized; as a creature of the upper planes the mount will only serve while its summoner remains truly good and pure in faith. 6 CP)

Proficiencies: Weapon and Armor (27 CP)

Skills: 46 skill points (46 CP)

Total: 533 CP out of 544 CP

Paladin Class Descriptions

A righteous champion and crusader for justice, the Paladin travels the world to spread joy and crush evil. Using their divinely-granted might to smite the wicked and heal the afflicted, Paladins exemplify the noblest aspects of civilized lands. Or they're mad killers who only happen to whack evil creatures. *C'est la vie.*

(3.0)

Available 504 CP (Base) + 40 (Duties) = 544 CP

Hit Die: 20d10 (120 CP)

Saves: +24 (72 CP)

Warcraft: +20 (120 CP)

Magic Levels: 17 Paladin (34 CP) + 10 Specialized Caster Levels (30 CP)

Abilities: (78 CP) - Occult Sense (*Detect Evil*, 6 CP),

Immunity (Disease, Fear, 12 CP), Improved Augmented Bonus III (*Divine Grace*, Specialized; only while truly good and pure in faith, 18 CP), Smite (6 CP), Turn Undead (3 + Cha Mod times per day at +2 levels, 12 CP), Presence (*Aura of Courage*, 6 CP), Healing Touch (with *Remove Disease*, 12 CP), Companion (Mount, 6 CP)

Proficiencies: Weapon and Armor (27 CP)

Skills: 46 skill points (46 CP)

Total: 527 CP out of 544 CP

(3.5)

Available 504 CP (Base) + 40 (Duties) = 544 CP

Hit Die: 20d10 (120 CP)

Saves: +24 (72 CP)

The Paladin comes out with a few points left over. A Paladin, however, usually has some other benefits. Most should have Good Reputation (6) and Privilege (Church Membership, entitled to assistance, 6 CP). A few automatic points in Knowledge: Religion (at least of his or her own) might also be in order.

Psion Class Description (3.0 & 3.5)

Where Wizards turn outward, Psions look within. Though wielding similar powers, they study the mind and its hidden might, eschewing the flows of mystic power. Usually controlled and calm, a

Psion enjoys the benefits of long hours of meditation on his or her chosen disciplines.

Available 504 CP (Base) = 504 CP

Hit Die: 20d4 (0 CP)

Saves: +24 (72 CP)

Warcraft: +10 (60 CP)

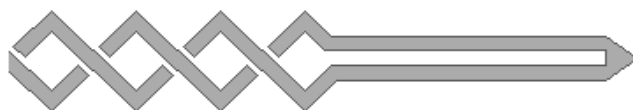

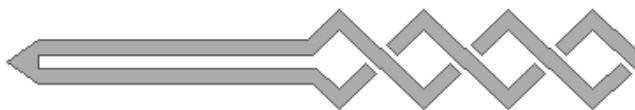

Magic Levels: 20 Psion (240 CP)

Abilities: (36 CP) - Companion (*Psicrystal*, 6 CP) and either Occult Combat 10 (3.0 version, 30 CP) or five bonus psionic feats (3.5 version, 30 CP)

Proficiencies: Weapon (3 CP)

Skills: 92 skill points (92 CP)

Total: 503 CP out of 504 CP

Psychic Warrior Class Description (3.0 & 3.5)

The power of the mind may also be turned to war. The Psychic Warrior studies combat, adapting his or her mindscape to its ever-changing conditions. While wielding some of the abilities of a Psion, they also become skilled with physical combat.

Available 504 CP (Base)

Hit Die: 20d8 (80 CP)

Saves: +24 (72 CP)

Warcraft: +15 (90 CP)

Magic Levels: 20 Psychic Warrior (120 CP)

Abilities: (3.0) (90 CP) - 9 Bonus feats (54), Occult Combat 10 (30 CP), and Fast Learner (6 CP)

(3.5) (48 CP) 8 Bonus feats (48 CP)

Proficiencies: Weapon and Armor (27 CP)

Skills: 46 skill points (46 CP)

Total: (3.0) 525 CP out of 520 CP with Fast Learner

(3.5) 483 CP out of 504 CP

The 3.0 Psychic Warrior was a trifle overpowered. The 3.5 version is slightly underpowered but, like the fighter, excels at small-scale combat so it usually passes unnoticed.

Ranger Class Descriptions

The Ranger masters the spirits of the wild, living on the outskirts of civilization. Unlike Druids, Rangers do not wield excessive magical power, but become one with the roaming beasts, the nimble prey, and the deadly predator. Armed with weaponry for a quick and sudden kill, Rangers pounce upon their prey.

Ranger 3.0 Class Description

Available 504 CP (Base) +10 (Very Limited Spell List) = 514 CP

Hit Die: 20d10 (120 CP)

Saves: +24 (72 CP)

Warcraft: +20 (120 CP)

Magic Levels: 17 Ranger (34 CP) + 10 Specialized Caster Levels (30 CP)

Abilities: (20 CP) - Track (6 CP), Favored Enemy (6 CP), Ambidexterity (Corrupted only in light or medium armor, 4 CP), Bonus Attack (Corrupted only in light or medium armor, 4 CP)

Proficiencies: Weapon and Armor (21 CP)

Skills: 92 skill points (92 CP)

Total: 509 CP out of 514 CP

Many people feel that the 3.0 Ranger isn't very powerful, and might object to rating them with more points than the Fighter. The sheer number of points

doesn't indicate anything about power. Some very powerful characters, at least in combat ability, can come from very few points. The Ranger isn't built to be the same kind of combat machine as the Fighter or Barbarian, regardless of how many points they have.

(3.5)

Available 504 CP (Base) +10 (Very limited spell list) +40 (Noncombative Spell List) = 554 CP

Hit Die: 20d8 (80 CP)

Saves: +30 (90 CP)

Warcraft: +20 (120 CP)

Magic Levels: 17 Ranger (34 CP) + 10 Specialized Caster Levels (30 CP)

Abilities: (51 CP) - Companion (Specialized half level, 3 CP), Lore (Animals, Specialized only to understand how to get along with them, *Wild Empathy*, 3 CP), Track (6 CP), Travel (Forest, 6 CP), Favored Enemy (6 CP), Combat Style feats (Corrupted only in light or medium armor, 12 CP), Fortune (Evasion, 6 CP), Celerity (Corrupted only increases tracking speed, 3 CP), [Skill Focus] (Hide, +Stunt, No skill bonus, Only in Wilderness, 3 CP), Immunity (Environmental Hazards, Common/Minor/Trivial 3 CP)

Proficiencies: Weapon and Armor (15 CP)

Skills: 138 skill points (138 CP)

Total: 558 CP out of 554 CP

This Ranger has a lot of relatively minor abilities that enhance skills while (in 3.5) upgrading in almost every other way. However, despite the fact that they'd be very useful to a warrior-scout, the Ranger has virtually no offensive, illusory, or stealth-related spells. The Noncombative modifier at least explains why not.

Rogue Class Description (3.0 & 3.5)

Trickery and deceit fill the Rogue's purse and ensure his or her survival. Whether for good or ill, a Rogue studies people, learning their foibles and weaknesses. Whether disarming a trap set by a self-confident merchant or slitting a throat of a foolish foe, the Rogue dances through the city with an easy grace only possessed by those who know their own skill.

Available 504 CP

Hit Die: 20d6 (40 CP)

Saves: +24 (72 CP)

Warcraft: +15 (90 CP)

Abilities: (81 CP) - Augment Attack (*Sneak Attack* 10, 30 CP), Fortune (*Evasion*, 6 CP), Awareness (*Uncanny Dodge*, +Danger Sense II and Specialized Flankless, 15 CP), Occult Skill (Use Magic Device, 6 CP), Special Ability selection (x4 at 6 CP each for 24 CP)

Proficiencies: Weapon and Armor 12 CP)

Skills: 184 skill points (184 CP)

Total: 479 CP out of 504 CP

The 3.0 version Corrupts the Danger Sense to reduce the bonus to +4, thus saving 2 CP and winding up with 27 CP left over.

The 3.5 version drops the Occult Skill feat, since Use Magic Device is no longer a restricted skill, but no longer Corrupts the Danger Sense, and winds up with 29 CP left over.

The Rogue is thus slightly under-powered. While Rogues may develop in many different ways, some of the most common places to expend a few of those points include: Contacts, Guild Membership (3 CP), Immunity to Divination (a must for thieves given the ready availability of reliable divination, 6 CP), and enough magical skill to spot it if you are up against major occult defenses (3 levels of Paladin/Ranger spellcasting mostly detection and illusion spells, 12 CP).

Sorcerer Class Description (3.0 & 3.5)

Often wielding magic gained from an inborn gift, the Sorcerer channels raw magical energy into inner magical channels, letting spells fly left and right. Less studious than the Wizard because he or she relies less on study, the Sorcerer gains power from exploring the very limits of his or her ability.

Available 504 CP (Base)

Hit Die: 20d4 (0 CP)

Saves: +24 (72 CP)

Warcraft: +10 (60 CP)

Magic Levels: 20 Sorcerer (320 CP)

Abilities: (6 CP) - Companion (*Familiar*, 6 CP)

Proficiencies: Simple Weapons (3 CP)

Skills: 46 skill points (46 CP)

Total: 507 CP out of 504 CP

Hmmph! Those Sorcerers must be stealing a few extra CP from the Fighters and Rogues.

Soul-Knife Class Description (3.5)

A Soul-Knife hones his or her mental edge to razor sharpness, eschewing psychic disciplines for the ability to create and control force internally. Relying on his or her mind and body in equal measure, the soul-knife creates a deadly weapon from his or her own mind, imbuing it with his or her most lethal thoughts.

Available 504 CP (Base)

Hit Die: 20d6 (120 CP)

Saves: +30 (90 CP)

Warcraft: +15 (90 CP)

Abilities: (80 CP) - Spirit Weapon (Ranged, Exotic Appearance, 9 CP), Augmented Attack (+5d8 weapon damage with spirit weapon [x3]. Specialized, only when

a Move-Equivalent Action is taken to charge the weapon, does not affect creatures immune to mind-affecting attacks, 30 CP), Upgraded Imbuelement (+Versatile, 18 CP), Opportunist (draw weapons in combat, 6 CP), Whirlwind (Corrupted cannot stack other abilities, 4 CP), Celerity (Corrupted not in heavy armor, 4 CP) Trick (Attribute Drain, 6 CP), and +1 Warcraft (Specialized: +2 with with Spirit Weapon only, 6 CP).

Proficiencies: Weapon and Armor (9 CP) - Light Armor, Shields, All Simple Weapons

Skills: 92 skill points (92 CP)

Total: 484 CP out of 504 CP

The Soul-Knife comes out a bit short on points. They should probably add an Occult Sense feat tailored to psychic powers and perhaps a few defensive abilities. As it is, they're awfully vulnerable and rely too heavily on a single powerful strike.

Wilder Class Description (3.5)

The Wilder, a psychic talent with a penchant for just unleashing it all, has much to offer as an adventurer. Despite their lack of versatility relative to Psions, they have just as much power, and even more punch in battle. Wilders can enter a state of absolute focus, channeling extra energy through their psychic disciplines.

Available 504 CP (Base)

Hit Die: 20d6 (40 CP)

Saves: +24 (72 CP)

Warcraft: +15 (90 CP)

Magic Levels: 20 Wilder (120 CP)

Abilities: (55 CP) - Hysteria (Psychic Powers Caster Level, Powered by risk of backlash rather than Mana or power, 6 CP), Augmented Bonus (Cha Mod to AC for Touch Attacks, 6 CP), Enhanced Attacks (Corrupted after Hysteria use only, +3 to hit +1d6 damage, 9 CP), Inherent Spell (Corrupted after Hysteria use only, +3 saves, 4 CP), Reflex Action (use Inherent Spell immediately after Hysteria, 6 CP) Costly (+Improved, 24 CP), Rite of Chi (Specialized, only to reduce cost of augmenting powers during Hysteria [x2 effect, 4d6 power], +Bonus Uses III, Specialized to double available number of uses, 25 total, 24 CP)

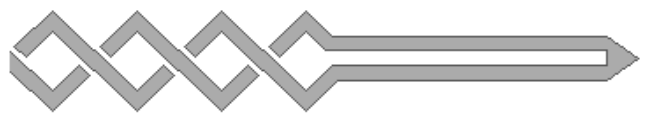

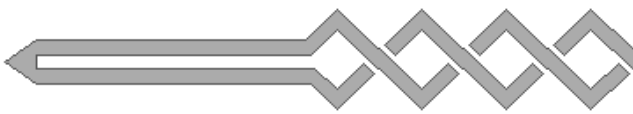

Proficiencies: Weapon and Armor (9 CP) - Light Armor, Shields, All Simple Weapons

Skills: 92 skill points (92 CP)

Total: 504 CP out of 504 CP

While the Wilder works perfectly well in point-buy, there are easier ways to temporarily boost your abilities.

Wizard Class Description (3.0 and 3.5)

Deeply entranced in quiet, contemplative study, the Wizard learns to feel and harness the flow of magical energy. While Wizards weave spells in a manner similar to Sorcerers, externalizing the formulae grants them far greater versatility. In ritual, the Wizard learns the deepest secrets of magical power, increasing both the force and complexity of his or her spells.

Available 504 CP (Base)

Hit Die: 20d4 (0CP)

Saves: +24 (72 CP)

Warcraft: +10 (60 CP)

Magic Levels: 20 Wizard (280 CP)

Abilities: (42 CP) - Bonus Feats IV (24 CP), Companion (*Familiar*, 6 CP), Fast Learner (2 spells/level, 6 CP), Spell Storing (*Scribe Scroll*, 6 CP)

Proficiencies: Weapon (2 CP)

Skills: 46 skill points (46 CP)

Total: 502 CP out of 504 CP

NPC Classes

“NPC Classes” simply take the “untrained” per-level point cost modifier (page 17). They can be adapted as PC classes by simply adding 120 CP worth of abilities. Extra skills, special abilities, and minor spellcasting commonly and easily fit in. Commoners have a very useful extra power, too, but it usually doesn’t work well for PC’s.

Adept Class Description (3.0 and 3.5)

The Adept, a primitive spellcaster, sees no distinction between the divine and the arcane. Both natural forces respond to his or her call. Adepts intercede between the Gods and the spirits and his or her fellows for the good of all – or for his or her own empowerment.

Available 384 CP (Base)

Hit Die: 20d6 (40 CP)

Saves: +24 (72 CP)

Warcraft: +10 (60 CP)

Magic Levels: 20 Adept (may take any kind of spell) (160 CP)

Abilities: (6 CP) - Companion (*Familiar*, 6 CP)

Proficiencies: Weapon (3 CP)

Skills: 46 skill points (46 CP)

Total: 387 CP out of 384 CP

Alright, they do come out 3 CP over the limit. Most such characters will have a Disadvantage or two, however. For example, Shamans often seem a little insane. Many such characters have Duties as well, and pick up additional social feats.

Aristocrat Class Description (3.0 and 3.5)

Usually a wealthy individual, the Aristocrat leads his or her fellows by right of heritage, popularity, subtle influence, bribery, or naked force. Depending on the society he or she lives in, an Aristocrat might be a properly called a statesman, Senator, councilman, Baron, or Pasha – the role differs slightly, but the essence of leadership remains.

Available 384 CP (Base) +40 (Duties) = 424

Hit Die: 20d8 (80 CP)

Saves: +24 (72 CP)

Warcraft: +15 (90 CP)

Abilities: (0 CP)

Proficiencies: Weapon and Armor (27 CP)

Skills: 92 skill points (92 CP)

Total: 361 CP out of 424 CP

The costs given above don't include Aristocrats' implied social and legal advantages. They should also get Privileges [Wealth (6 CP), the right to go armed (3 CP), various Legal Immunities (12 CP), and membership in the aristocracy (3 CP)], Favors (18 CP), Contacts (9 CP), Professional (+L/2 to rolls involving politics and favors, 6 CP), and Reputation (6 CP). This uses up those extra points quite precisely - and neatly explains why newly ennobled characters rarely rise to the level of influence of nobles by birth: they have fewer points invested in those abilities.

Commoner Class Description (3.0 and 3.5)

Most happy when the tax collectors forget them, the commoner wishes to be left alone. To most commoners, the world is a fine place right where they live. Other lands might be nice to visit, but never to stay in. It just wouldn’t be home. Strangely, commoners simply ignore the horrible supernatural menaces around them and expect the same in return. They mostly get it, too.

Available 384 CP (Base)

Hit Die: 20d4 (0 CP)

Saves: +18 (54 CP)

Warcraft: +10 (60 CP)

Abilities: (200 CP) – Ignored (200 CP)

Proficiencies: Weapon (1 CP)

Skills: 46 skill points (46 CP)

Total: 361CP out of 384 CP

Commoners should probably have some connections with a local lord, and perhaps a few more skill points – but who cares? Somehow I just can't bring myself to spend any more time on commoners.

They probably like it that way.

Ignored. The commoner is basically defenseless and ought to make an attractive target. Nevertheless, in a world filled with horrible monsters, demons, gods, and incredibly powerful adventurers, commoners somehow survive in large numbers, usually relatively happily. Somehow, they even cause many of those powerful entities to spend a lot of time looking after them. In many worlds adventurers hire commoners as porters and find that even after a huge battle with fireballs flying everywhere, the porters have simply "stayed out of the way" somehow. They won't even be singed. Sadly, this costs 10 points per character level or it has no effect, and doesn't work for anyone who actually is a threat.

Available 384 CP (Base)
Hit Die: 20d8 (80 CP)
Saves: +24 (72 CP)
Warcraft: +20 (120 CP)
Abilities: (0 CP)
Proficiencies: Weapon and Armor (27 CP)
Skills: 46 skill points (46 CP)
Total: 345 CP out of 384 CP

See the Fighter entry. Honestly, much the same commentary applies. Unfortunately, the Warrior has such a limited advantage in physical combat that he or she really needs something extra there, too.

Expert Class Description (3.0 and 3.5)

Someone has to make intricate clocks, advise the aristocrats on the proper method of irrigation, and orchestrate the construction of the new town hall. That person is the Expert. Armed with knowledge both practical and theoretical, most experts make a fine living by their own crafts, skills, and ideas. Some of the best Experts live on in legend forever – far longer than a mere hero – by expanding the sciences, discovering new principles of magic, or by finding uses for medicinal plants.

Available 384 CP (Base)
Hit Die: 20d6 (40 CP)
Saves: +24 (72 CP)
Warcraft: +15 (90 CP)
Abilities: (3.0, 18 CP) Occult Skill II (access any two exclusive skills, 12 CP), and Reputation (Master, 6 CP)
 (3.5, 6 CP) Reputation (Master, 6 CP)
Proficiencies: Weapon and Armor (6 CP)
Skills: 144 skill points (144 CP)
Total: 358 or 370 out of 384 CP

The 3.0 Expert has 14 extra CP left over. A pair of Skill Emphasis feats should come in around level 8 and level 16, with two extra points left over for skills. With the elimination of the 3.0 Exclusive skills, the 3.5 Expert has 26 CP left over, and can probably afford to pick up a hobby or to dabble in a bit of professional magic.

Warrior Class Description (3.0 & 3.5)

Usually a guard or soldier, the Warrior doesn't spend his or her entire life looking for new combat tricks and techniques. Simple, everyday hacking is more than enough for a Warrior, enabling him or her to defend his or her employers, village, or nation with sufficient ferocity.

Prestige Classes

These classes all have a maximum level of 10 and can only be taken after level 1 in normal d20. They thus have a 240 point base and often include redundant abilities. Weapon and Armor proficiencies aren't considered; the vast majority of characters gain nothing from Prestige Class proficiencies, since they overlap entirely with what the character will almost certainly have already gained. Prestige Classes won't come out quite as evenly as full 20 level classes, since these try to give abilities at least every level.

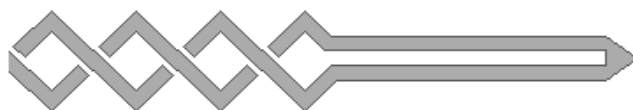

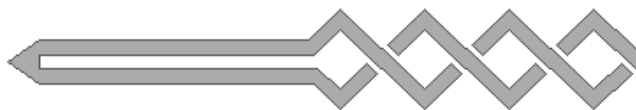

Note that there are no requirements for any of these classes in point-based games. After all, you can just buy the relevant abilities directly if you want them. You can be a Paladin with Assassin abilities if you want, though this might break your restrictions. You can be a Paladin/Blackguard, too, but you'll have to swap the per-level flaws out for something more appropriate. You also don't really need to worry about levels, specifically, though as always taking abilities outside your theme could earn you penalties from the GM.

Finally, we decided to be a bit humorous about these last classes. We figure you've gone all this way and you may as well get some entertainment out of it.

Arcane Archer Class Description (3.0 & 3.5)

Arcane Archers fire magic arrows at people. They have some extra abilities to fire specially-enchanted magic arrows, too. This is much like any other d20 archer, but he or she fires magic arrows without having to buy them, enchant them, or find them as treasure.

Available 240 CP (Base)
Hit Die: 10d8 (40 CP)
Saves: +17 (51 CP)
Warcraft: +10 (60 CP)
Abilities: (42 CP) - Imbuement (Missile Weapon only, 12 CP), Inherent Spell 5 (30 CP)
Skills: 40 skill points (40 CP)
Total: 233 CP out of 240 CP

Arcane Trickster Class Description (3.5)

Now, you wouldn't think you needed this class. Isn't d20 supposed to be about letting you do this kind of thing with multiclassing? But, here it is: breaking the multiclass restrictions one at a time, the Arcane Trickster. I suppose he *would* do it, too.

Available 240 CP (Base)

Hit Die: 10d4 (0 CP)

Saves: +17 (51 CP)

Warcraft: +5 (30 CP)

Magic Levels: 10 Special (Bard, Wizard, and Sorcerer, averaging 120 CP)

Abilities: (24 CP) - Augment Attack V (15 CP), Inherent Spell (with +2 uses, 10 CP*), Immunity (Opponent's Dex bonus to AC, Very Common/Severe/Major, Specialized 2/day only, 9 CP)**

Skills: 40 (40 CP)

Total: 275 CP out of 240 CP

* There's no reason why one can't use skills though a telekinetic spell. This ability is a minor upgrade on *Mage Hand* due to increased range (30'), but isn't nearly as powerful as *Telekinesis*. The character may have to design a special spell for the Inherent Spell feat, but that's nothing for a point-buy character.

** Any opponent without a Dex bonus becomes vulnerable to Sneak Attack damage, unless they are totally immune. A good point-buy character pays attention to little rules like that.

This class presents a conversion problem; a Sorcerer with a few Rogue levels loses nothing at all by taking it - and is already spending all of his or her points on Sorcerer abilities each level. Even a Wizard only loses a couple of feats. A level of Fast Learner and one or two of Adept will make up most of the difference if you want to play a character that matches the original build, but a limitation or two might be in order.

Archmage Class Description (3.5)

The Archmage does get some useful abilities, but it doesn't even translate as a class. If you want to be a full "Archmage" just spend 18 CP or three bonus feats.

Arcane Fire, Arcane Reach, Mastery of Elements, Mastery of Shaping, Spell Power, and Mastery of Counterspelling all translate as Metamagic: Persistent with Sacrifice (6 CP) and a specialized spell (1 CP each, total of 6 CP). For example, the *Arcane Reach* spell simply says "for the next one minute any touch spells I cast have a range of 60 feet". Seems fairly reasonable for a fourth level spell, no? Now sacrifice a 7th level spell slot to turn it into a permanent supernatural ability, and there you are.

Spell-Like Ability: Innate Magic (6 CP)

Assassin Class Description (3.0 & 3.5)

Some people just gotta die, says the Assassin, and he or she makes good on his or her word. Killing people for money has always been a sturdy business plan, and the Assassin is good at it. She, uh, sneaks up and attacks people. And they die.

It might hurt, but not for long.

Available 240 CP (Base)

Hit Die: 10d6 (20 CP)

Saves: +13 (39 CP)

Warcraft: +7 (42 CP)

Magic Levels: 14 Paladin/Ranger (28 CP) + 10 Specialized Caster Levels (30 CP)

Abilities: (41 CP) - Trick (*Death Attack*, 6 CP), Poison Use (6 CP), Augment Attack V (*Sneak Attack*, 15 CP), Awareness (*Uncanny Dodge*, 6 CP), Resist III (+6 on saves versus Poison, 9 CP)

Skills: 40 skill points (40 CP)

Total: 240 CP out of 240 CP

* *The 3.5 Assassin changes only one thing: the magic progression goes to 17 Paladin/Ranger, and costs 34 CP instead of 28.*

Blackguard Class Description (3.0 & 3.5)

"Mwah ha ha ha ha haaaa! I am so Evil!" This distinctive, if somewhat tasteless, motto of the Blackguard pretty much says everything you need to know about one. In fact, you probably don't *want* to know anything more. They're just like Paladins, except just the opposite. Unpleasant.

Available 240 CP (Base) +20 (Duties: Evil) + 40 (2 Restrictions: Hated and Feared, Inherently Evil and Hunted by Good) = 300 CP

Hit Die: 10d10 (60 CP)

Saves: +13 (39 CP)

Warcraft: +10 (60 CP)

Magic Levels: 14 Paladin/Ranger (56 CP)

Abilities: (69 CP) - Occult Sense (*Detect Good*, 6 CP), Poison Use (6 CP), Augmented Bonus III (*Dark Blessing*, 18 CP), Smite (6 CP), Command Undead (3/day, -2 level penalty, 12 CP), Presence (*Aura of Despair*, 6 CP), Companion (*Fiendish Servant*, 6 CP), Augment Attack 3 (*Sneak Attack*, 9 CP)

Skills: 20 skill points (20 CP)

Total: 304 CP out of 300 CP

**The 3.5 Blackguard gains 2 additional uses of Smite Good, which cost an extra 3 CP. (It's Specialized for half the usual number of uses).*

Dragon Disciple Class Description (3.5)

Dragon Disciples claim they have mystical dragon ancestry. Given that dragons seem to reproduce with everything and have been around for eons upon eons, they're right. They just leave off the fact that everyone else has it, too.

Available 240 CP (Base)

Hit Die: 10d12 (40* CP)

Saves: +17 (25* CP)

Warcraft: +7 (21* CP)

Magic Levels: 7 Bonus Spells (Invocation; Specialized, spell slots cannot be reassigned after they're acquired, 21 CP)

Abilities: (121 CP) - Occult Sense (Blindsense 60', 4* CP), Half-Dragon Template (105 CP), Wings (Celerity with additional movement mode, +12* CP)

Skills: 20 (20 CP)

Total: 248 CP out of 240 CP.

*Specialized. These abilities mark the character as an obvious monstrous supernatural being with scales, bulging muscles, and the "dragon" type. He, she, or it can expect a lot of suspicion and minor difficulties in civilization and in social situations. If the game revolves entirely around killing things and stealing their stuff this is fairly meaningless, and the Dragon Disciple is likely overpowered.

For a class originally presented in a book on mages, the Dragon Disciple is a surprisingly good deal for more combat-oriented types and a poor one for spellcasters.

Duelist Class Description (3.5)

Like the Arcane Trickster, the Duelist also fills a hole in the game system. Normally, there is no good way to do a lightly-armored fencer character, except by having piles of magic items. This is quite realistic given the kind of firepower monsters are throwing around, but since when did d20 and reality ever meet?

Available 240 CP (Base)

Hit Die: 10d10 (60 CP)

Saves: +15 (43 CP)**

Warcraft: +10 (60 CP)

Abilities: (39 CP) - Advanced Augmented Bonus (Int to AC, Corrupted +1/class level maximum, 5* CP), Improved Initiative +4 (6 CP), Immunity (+4 AC versus Attacks of Opportunity, Common/Major/Minor, 4* CP), Augment Attack II (+2d6 damage with light or one handed piercing weapons; does not affect creatures immune to critical hits, cannot be used with Bonus Attack, 4* CP), Immunity (rough terrain while charging, Minor/Minor/Trivial, 1 CP), Defender IV (Specialized:

only while fighting defensively or using total defense in melee, 15 CP), Block (Missile, 4*** CP)

Skills: 40 (40 CP)

Total: 242 out of 240 CP

* Corrupted. Not usable while wearing armor or using a shield.

** Counts the Reflex bonus which, for no apparent reason, comes from a special ability. It does save 2 CP due to not being usable with armor or shield however.

*** Must be using a light or one-handed piercing weapon at the time.

Standard Duelists apparently lose their proficiencies with armor and shields. Unlike most classes which list "A xxx gains no..." a Duelist is noted as possessing "no type of armor or shield [proficiency]." This appears to be unique.

Dwarven Defender Class Description (3.0 & 3.5)

A Dwarven Defender (though any point-buy character can possess these powers) stands there and allows people to run at her. Then he or she swats them and more people run at him or her. This continues until the Defender gets really tired, dies (difficult), or runs out of people to hit.

Available 240 CP (Base)

Hit Die: 10d12 (80 CP)

Saves: +17 (51 CP)

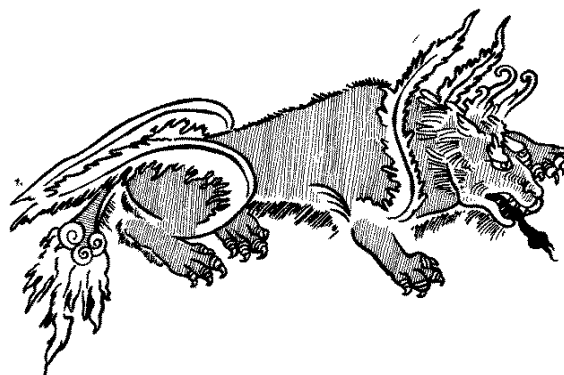

Warcraft: +10 (60 CP)

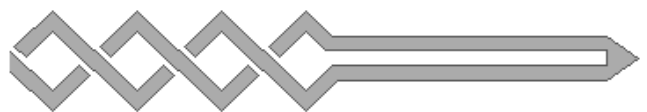

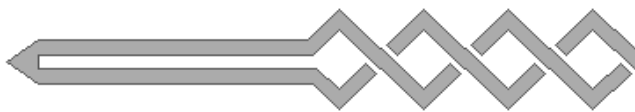

Abilities: 6 (36 CP) - Berserker (Defensive Stance, +Odinpower, +Bonus Uses, Specialized cannot move, 8 CP), Awareness (Uncanny Dodge, 6 CP) Damage Reduction 6/- (15 CP)

Skills: 20 skill points (20 CP)

Total: 240 CP out of 240 CP

**The 3.5 version relaxes the Berserker to Corrupted, since they can take a 5-foot step. This adds +2 CP. They also gain the +Danger Sense augmentation to Awareness at +3 CP.*

Eldritch Knight Class Description (3.5)

While not particularly weak, the Eldritch Knight gets our vote for **“Most Boring Prestige Class Ever Designed.”** One feat and nine levels of magic? And all to patch the fact that Fighter/Mages weren’t very good?

All right. It’s a Sorcerer or Wizard (could be a Bard, but there’s no point) with one extra hit point per level (Self-Development: Constitution for HP, 12), one extra Feat (6 CP), +5 BAB (30 CP), the saving throws shifted around (free), and a few more points in Weapon Proficiencies (+6 CP). That’s +54 CP. They’re normally giving up two levels of spellcasting (28 or 36 CP) and any special class bonuses they’d normally get other than Magic Levels; that’s familiar advancement (Corrupted to limit it, saves 2 CP) and 12 CP (two feats) for wizards. That’s a net profit of 12 or 16 CP. Just Corrupt or Specialize something.

Hierophant Class Description (3.5)

Supposedly the greatest blessed servants of the divine powers, Hierophants are surprisingly balanced. Their special abilities are rarely worth five full levels of spellcasting, but many divine spellcasters find one or two levels of Hierophant valuable.

Available 120 CP (Base)

Hit Die: 5d8 (20 CP)

Saves: +9 (27 CP)

Warcraft: +2 (12 CP)

Magic Levels: +5 Caster Level (15 CP)

Abilities: (30 CP or less, select five of them)*

Skills: 10 (10 CP)

Total: 114 CP out of 120 CP

*Abilities translate as follows.

- **Blast Infidel:** Maximize (Glory, Specialized only affects negative energy attack spells against targets with opposite alignment, 6 CP)
- **Faith Healing:** Maximize (Glory, Specialized only affects positive energy healing spells against targets with same alignment, 6 CP)
- **Divine Reach:** Inherent Spell (Estimated to be a 3rd level spell, 6 CP)
- **Gift of the Divine:** Blessing (Only works on Turn Undead, 3 CP)
- **Mastery of Energy:** Channeling (+6 CP spent on basic Channeling abilities)
- **Metamagic Feat:** Any Metamagic Feat (6 CP)
- **Power of Nature:** Blessing (Specialized only works on Shapeshifting, 3 CP)
- **Spell Power:** Increase Caster Level (3 CP)
- **Spell-like Ability:** Innate Magic (6 CP)

Horizon Walker Class Description (3.5)

A wanderer in unknown lands, the Horizon Walker travels the world and worlds beyond. Most just plain like to travel. And with that many worlds to explore, why not do so?

Available 240 CP (Base)

Hit Die: 10d8 (40 CP)

Saves: +13 (39 CP)

Warcraft: +10 (60 CP)

Abilities: 64 to 74 CP (66 to 76 CP depending on ability selection* plus Augment Attack: +1 to hit and damage against creatures native to mastered terrain types (8 CP)

Skills: 40 (40 CP)

Total: 243 to 253 out of 240 CP

*Abilities translate as follows.

- **Aquatic.** Celerity I (Swim speed, 6 CP) OR Skill Focus and Skill Emphasis Swim (totaling +4, 7 CP)
- **Desert.** Immunity (Exhaustion, Uncommon/Minor/Minor, 2 CP)
- **Forest.** Skill Focus and Skill Emphasis Hide (totaling +4, 7 CP)
- **Hills.** Skill Focus and Skill Emphasis Listen (totaling +4, 7 CP)
- **Marsh.** Skill Focus and Skill Emphasis Move Silently (totaling +4, 7 CP)
- **Mountains.** Celerity I (Climb speed, 6 CP) OR Skill Focus and Skill Emphasis Climb (totaling +4, 7 CP).
- **Plains.** Skill Focus and Skill Emphasis Spot (totaling +4, 7 CP)
- **Underground.** Occult Sense (Darkvision, 6 CP)
- **Fiery.** Immunity (Fire, Common/Major/Major, Corrupted only 20 resistance, 6 CP)
- **Weightless.** Celerity III (Corrupted and Specialized: only works on Flight speed without gravity, 6 CP)
- **Cold.** Immunity (Cold, Common/Major/Major, Corrupted only 20 resistance, 6 CP)
- **Shifting.** Occult Sense (natural spatial distortions in the direction you want to go, 6 CP)
- **Aligned.** Immunity (Outer-planar alignment magic, Common/Minor/Major, 6 CP)
- **Cavernous.** Occult Sense (Tremorsense, 6 CP)

Loremaster Class Description (3.0 & 3.5)

The Loremaster collects lore. And he or she gets some minor abilities for it. Well, we're about done here.

Available 240 CP (Base)

Hit Die: 10d4 (0 CP)

Saves: +13 (39 CP)

Warcraft: +5 (30 CP)

Magic Levels: 10 Special (120 CP)*

Abilities: (30 CP) - Bonus Feat V (*Secret*, average 18 CP total), Lore (Greater, True, 12 CP)

Skills: 40 skill points +2 Languages (42 CP)

Total: 261 CP out of 240 CP

**This number comes from the average of Cleric, Druid, Sorcerer, and Wizard progressions.*

As expected, a Sorcerer or Wizard turned Loremaster is a bit overpowered in comparison to the standard classes, since it offers more skill points and level benefits at a cost of 2 feats for Wizards and nothing at all for the Sorcerer. Clerics break even, while Druids lose a bit.

Mystic Theurge Class Description (3.5)

Entry number four in the "There's gaping hole in the multiclass system" parade, the Mystic Theurge lets you boost up your arcane and divine spellcasting. For most arcane casters, this is a very good deal in the long run, though you won't get your top level or two of spells.

Available 240 CP (Base) + 40 CP (Cleric Restrictions) or 80 CP (Druid Restrictions).

Hit Die: 10d4 (0 CP)

Saves: +13 (39 CP)

Warcraft: +5 (30 CP)

Magic Levels: 10 Divine (normally 80 or 100 CP) + 10 Arcane (normally 40, 90, or 130 CP; Base - 2 CP/Level for upgrading divine Caster Level to cover two lists at +1 CP/level rather than +2, and 2 or 3 CP/level off for applying the priestly conduct limitations) for a net total of 120 to 230 CP

Abilities: (0 CP)

Skills: 20 (20 CP)

Total: 209 (Druid/Bard) to 319 (Cleric/Sorcerer). A Cleric/Wizard - the apparent goal of the class - actually comes out just about right, at 279 CP out of 280.

Shadowdancer Class Description (3.0 & 3.5)

The Shadowdancer dances... with the Shadows! They strike... from the Shadows! They flee to safety... in the Shadows!

Er... they see in the dark... in the Shadows?

Alright, let's face it, we're don't really need all that space to describe her. A Shadowdancer is a Rogue with some shadow-based inherent magic.

Available 240 CP (Base)

Hit Die: 10d8 (40 CP)

Saves: +13 (39 CP)

Warcraft: +7 (42 CP)

Abilities: (60 CP) - [Skill Focus] (Hide, +Stunt, Specialized no skill bonus, 3 CP), Fortune (*Improved Evasion*, +Improved 12 CP), Occult Sense (Darkvision, 6 CP), Inherent Spell (*Defensive Roll*, 6 CP), Awareness (*Uncanny Dodge*, 6 CP), Companion II (*Summon Shadow*, +Template, Specialized potential XP loss, 9 CP), Inherent Spell (*Shadow Illusion*, *Shadow Jump*, 9 CP), Luck (*Slippery Mind*, +Bonus Uses, Enchantment only, 9 CP)

Skills: 60 skill points (60 CP)

Total: 241 CP out of 240 CP

Thaumaturgist Class Description (3.5)

This poor build offers very few useful abilities, and normally has particularly useless prerequisites. You can get much the same effect by just taking the Leadership feat in any version of d20. A couple of the abilities (Persistent and Triggering) would have been nice, except that they were specialized almost out of utility.

Available 120 CP (Base) + 20 (Cleric Limitations)

Hit Die: 5d4 (0 CP)

Saves: +6 (30 CP)

Warcraft: +2 (12 CP)

Magic Levels: 5 Cleric (50 CP)

Abilities: (35 CP)* - Inherent Spell (*Augment Summoning*, +Multiple, +4 Str and Con for summoned creatures, 12 CP), Persistent (+Glory, Corrupted Summoning spells only, 9 CP), Triggering (+Improved Glory, Specialized in Summoning spells only, Corrupted only one such spell at a time, 6 CP), Leadership (+outsider followers, Specialized no followers except cohort, 5 CP)

Skills: 10 (10 CP)

Total: 134 out of 140 CP

***Improved Ally** is a not a special ability. If the character has a plausible bargain to strike with a summoned creature, why shouldn't he or she be able to make a Diplomacy check to reduce the hiring price? Being a member of a special class has nothing to do with it. If the character has leverage or common goals, he or she has a means of convincing a summoned creature to help for less. If not, he or she doesn't. If the character doesn't want to take any time with said negotiations, he or she needs to buy the Reflex Training Point-Buy feat.

D20 Modern Base Classes

d20 Modern characters have “Talents” as well as Feats. In general, these are simply restricted-list feats, and so are covered under that entry. Since d20 Modern classes are ten-level classes with no special restrictions, they have a total of 264 CP available (counting level “0”). Being far less variegated than fantasy classes, they are listed here in an abbreviated fashion. Unsurprisingly, most of them are a few points underpowered compared to the Fantasy classes.

Strong Hero; Hit Die: 10d8 (40 CP), **Saves:** +11 (33 CP), **Warcraft:** +10 (60 CP), **Feats:** 10 (60 CP), **Proficiencies:** Simple Weapons (3 CP), **Defender** 5 (24 CP), **Skills:** 26 skill points (26 CP), **Action Hero** (Heroism Option, +3 Bonus AP per level, 12 CP). **Total:** 258 CP out of 264 CP

Fast Hero; Hit Die: 10d8 (40 CP), **Saves:** +11 (33 CP), **Warcraft:** +7 (42 CP), **Feats:** 11 (66 CP, 10 general and Fast Learner specializing in Defense), **Proficiencies:** Simple Weapons (3 CP), **Defender** 8 (22 + 20 CP from Fast Learner), **Skills:** 52 skill points (52 CP), **Action Hero** (Heroism Option, +3 Bonus AP per level, 12 CP). **Total:** 260 CP out of 264 CP

Tough Hero; Hit Die: 10d10 (60 CP), **Saves:** +11 (33 CP), **Warcraft:** +7 (42 CP), **Feats:** 10 (60 CP), **Proficiencies:** Simple Weapons (3 CP), **Defender** 5 (24 CP), **Skills:** 26 skill points (26 CP), **Action Hero** (Heroism Option, +3 Bonus AP per level, 12 CP). **Total:** 260 CP out of 264 CP

Smart Hero; Hit Die: 10d6 (20 CP), **Saves:** +11 (33 CP), **Warcraft:** +5 (30 CP), **Feats:** 11 (66 CP, 10 General Feats plus Fast Learner specializing in Skills), **Proficiencies:** Simple Weapons (3 CP), **Defender** 3 (12 CP), **Skills:** 104 skill points (84 CP + 20 SP from Fast Learner), **Action Hero** (Heroism Option, +3 Bonus AP per level, 12 CP). **Total:** 260 CP out of 264 CP

Dedicated Hero; Hit Die: 10d6 (20 CP), **Saves:** +13 (39 CP), **Warcraft:** +7 (42 CP), **Feats:** 10 (60 CP), **Proficiencies:** Simple Weapons (3 CP), **Defender** 5 (24 CP), **Skills:** 52 skill points (52 CP), **Action Hero** (Heroism Option, +3 Bonus AP per level, 12 CP). **Total:** 252 CP out of 264 CP

Charismatic Hero; Hit Die: 10d6 (20 CP), **Saves:** +13 (39 CP), **Warcraft:** +5 (30 CP), **Feats:** 10 (60 CP), **Proficiencies:** Simple Weapons (3 CP), **Defender** 3 (12 CP), **Skills:** 78 skill points (78 CP), **Action Hero** (Heroism Option, +3 Bonus AP per level, 12 CP). **Total:** 254 CP out of 264 CP
