

Chapter 4: High-Level Magic

Who says subtlety is best?

If you don't like the Epic Magic System and wonder why spells stop at level nine, here's a list that doesn't. Characters with very high levels can reach these spells via (Mighty) Invocation.

They also make wonderful plot devices.

As a practical matter, many of the spells listed here are noncombative. Using metamagic or just increasing the damage from normal spells easily handles most such effects, and so including mere advanced versions here adds nothing.

Many of these spells aren't as directly deadly as simple Death, Disintegrate, or Polymorph effects; high-level opponents often make themselves immune to such things. High-level characters must use increasingly obscure spells as they rise in power until they reach the point at which they begin battling solely through indirect assault.

Spell Key

The high-level spells still use general format as the basic SRD spells, but do have a few new options.

Schools: Spells this powerful often involve more than one school. This entry lists the schools the caster normally must be able to use, but variants that use other schools may exist if the GM agrees.

Level: To facilitate picking spells for those grandiose NPC villains the spell lists are arranged first by level and then alphabetically. Similarly, no distinction has been made between caster types; it makes little difference in magic of this level.

Components: Components are Verbal and Somatic unless listed otherwise.

Range: Two additional range categories appear here; *Extreme* (800 ft + 80 ft/Level) and *Line of Sight*. LOS spells have a soft maximum of one mile; beyond that it's hard to see your target, and a ranged touch attack roll (at a cumulative -2 for each mile) may be required. In general, if you can see it clearly, you can hit it.

Target, Effect, or Area: If applicable, this is explained in the description. Spells this powerful don't have to target a specific kind of creature or object. They'll affect anything, though

often the magic is wasted. A spell to make the target's metabolism faster does nothing for a sword, while metal-strengthening spells rarely enhance humans.

Duration: As normal, although a few have very long durations indeed.

Casting Time: There's a new option here: Ritual. Ritual spells take time to cast, anywhere from 1 minute to 8 hours. Ritual spells require that a character have plenty of free time to use, but the exact amount doesn't matter.

Saving Throw: As normal. All spells which help a creature are by definition harmless. If a the target wishes to forgo their save, then so be it; it isn't important to note specifically.

Spell Resistance: As normal, except as noted above under Saving Throw.

Note that mind-affecting enchantments of level 10 and up trump most type-based immunities as long as the target has a mind at all. Intelligent undead and constructs can be affected normally.

The Spells

Tenth Level Spells

Arcane Geist

Evocation, Necromancy, Transmutation

Range: Touch

Duration: Ten minutes per level (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The target transforms into a being of pure magical energy. He or she gains flight (60 feet./round), the Incorporeal ability, the Body Fuel feat along with the Efficient and Blood Magic upgrades, and the ability to freely weave spell effects of up to level three powered by either Body Fuel or by giving up other memorized or spontaneous spells. If the target already has the Body Fuel abilities he or she gains an extra level of Efficient and/or Blood Magic up to the normal maximums.

Bloodmight

Necromancy, Conjunction

Components: S

Range: Medium (100 ft + 10 ft/level)

Duration: Three days.

Casting Time: One Standard Action

Saving Throw: Will negates (for still-living targets)

Spell Resistance: Yes (for still living targets)

Bloodmight drains the energies of a dying (at -1 HP or less) or newly dead (ten minutes or less) target into the caster. The caster gains 3d8 temporary hit points, a +2 bonus to Strength and Constitution, and the use of any remaining spells, spell-like powers, or supernatural abilities which the target had available for the day. Defensive and personal powers continue to work for the duration, while externally-directed powers are good for one use each.

Cleanse the Soul

Abjuration, Necromancy, Transmutation

Range: Touch (May affect noncorporeal entities)

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

A spirit targeted by this spell is cleansed of all bonds and taints and released cleanly into the greater multiverse. This generally means it won't be coming back anytime soon. As a side effect, any pre-existing pacts (as with demon-lords or similar ilk) or preset destinations are voided. This may incur severe irritation towards the caster on the part of said demon-lords.

Coronation

Divination, Enchantment

Components: V, S, M (Crown and anointing oil)

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

Coronation acts like a limited version of Dominion. The ruler so crowned gains an intuitive sense that allows them to rule well (+10 competence bonus on Profession: Administrator and Gather Information within the nation), senses any major disturbances, and may channel magical energy to and from the land. This allows the new ruler to spend his or her personal vitality (HP) and magic on repairing damage to the land or to draw an extra (Con/3) points of Mana from it each day while within the realm's boundaries. On the downside, the ruler is bound to the land and cannot willingly leave his or her domain for more than (Con) weeks. Coronation fulfills any in-game requirements for taking the Dominion ability.

Distillation

Conjuration, Transmutation

Range: Close (25 ft + 5 ft/2 levels)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Fort or Will negates as appropriate

Spell Resistance: Yes

This spell extracts an essence from the target and stores it in a small container which the caster must provide (any will do, with certain exceptions as noted below). Exactly what gets extracted depends on the caster, but he or she can cull even abstract ideas. The caster may then use it any manner he or she deems fit.

For example, Mervin the Mage calls out the humor in a joke book (he stores it in a hollow rubber chicken), getting a cheery, bubbling, sparkling liquid. Mervin could then drink it and gain a half-way decent knowledge of jokes and stand-up comedy for a day or two, fling it at the enemy to make them laugh (not that this keeps them from beating up the party), or give Humbug Harry a decent sense of humor for the evening.

Dangerous qualities may be extracted, too, but must be contained carefully. Fire-extracts will burn through weak containers, for example. Character abilities and statistics can be extracted, but fade within a day or two. They're only good for a temporary boost. Inanimate objects lose the culled quality permanently, but characters recover 2 attribute points or 6 CP every day.

Excellent Lore

Divination, Transmutation

Components: S

Range: Touch

Duration: 24 Hours (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The target gains +(Int) skill points or half that in CP for the next 24 hours.

The L14 version provides +(Int) CP, while the L18 version provides +2 x (Int) CP. Sadly, the spell does not stack with itself or with similar effects.

The Excellent Sphere of Disintegration

Evocation, Conjunction, Transmutation

Range: Long (400 ft + 40 ft/Level)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Fort partial

Spell Resistance: Yes

All desired items and characters within a 15' radius suffer the effects of *Disintegrate*. Anything which the caster does not want to disintegrate remains unaffected.

The Executioner's Cell

Abjuration, Conjunction, Transmutation

Range: LOS

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: Reflex negates

Spell Resistance: Yes

This spell imprisons the target within a pocket dimension (similar to *Imprisonment*) filled with a hostile elemental force. This means that the target takes 3d6 fire (fire), crushing (earth), or cold (air) damage each round. Alternatively, the target begins to suffocate if not protected from suffocation (water, vacuum, or earth).

Fastness of the Heart

Abjuration, Enchantment, Illusion

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

You create an impenetrable seal over the targets personal secrets and desires. They cannot be forced from the target or involuntarily betrayed. Divination magic and psionic effects of less than 12th level cannot reveal such secrets, nor can mind-control magic, torture, threats, or blackmail compel the target to speak them.

Grandiose Summoning

Conjunction, Transmutation

Components: V, S

Range: Medium (100 ft + 10 ft/level)

Duration: 1 minute/level (D)

Casting Time: 1 Round

Saving Throw: None

Spell Resistance: No

Grandiose Summoning is simply the high-level version of the standard summoning spells and can be cast

at higher levels than this; the spell automatically adjusts to the slot it occupies. A Grandiose Summoning can summon 1d4+1 creatures of up to CR ([Spell Level x3/2] -2) or a single creature of up to CR (Spell Level x3/2).

Specialized versions that summon specific creatures can be designed. Such individualized spells can summon creatures with a CR of up to ([Spell Level x2] -2).

The Irresistible Lure

Divination, Enchantment, Illusion

Range: Medium (100 ft + 10 ft/Level)

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

This creates a total and complete illusion of the target's desires. If the victim fails to save, he or she will follow the illusion anywhere, accept it as a bribe, and so on. Of course, the GM may occasionally state that this spell is ineffective against a given NPC, assuming they have no desires that the spell is incapable of simulating. This occasionally turns up with undead and constructs.

Marketing

Divination, Conjunction

Range: Personal

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

This spell puts you (only the caster) in contact with individuals who need 1d6 of your spells and can afford them. You receive half the usual fees if you choose the spells or full price if you allow the GM to do so. This spell cannot distinguish between merit or morals of the targeted individuals, but does distinguish between would-be ambushers and deadbeats and those who are actually going to pay. It counts as having "studied carefully" for the purposes of *Teleporting* to the target location.

Rain of Ooze

Conjunction, Transmutation

Range: Long (400 ft + 40 ft/Level)

Duration: One full round

Casting Time: One Standard Action

Saving Throw: None (except for a specific Ooze effect)

Spell Resistance: No

Rain of Ooze causes a rain of any toxin, nauseating goo, acid, corrosive, glue, oil, honey, or even slime or ooze monsters of up to 10 hit dice to rain down in a radius of up to 60 feet. The glop is real and permanent.

Sending

Divination, Conjunction

Components: V, S, M (a written description of the task to be accomplished)

Range: Personal

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

This spell locates several reliable subcontractors for a particular task, including an estimated price, contact method, and a few notes on the advantages and disadvantages of each.

Shadow Vitae

Conjuration, Illusion, Necromancy

Range: Long (400 ft + 40 ft/Level)

Duration: 2d6 x 10 Minutes

Casting Time: One Standard Action

Saving Throw: Fort Negates

Spell Resistance: Yes

All allies within a 30' radius recover to full health, shrug off any status effects or negative levels, and recover all lost attributes. Sadly, all of this is temporary.

Ship of Shadow

Conjuration, Evocation

Components: V, S, M (the relevant element)

Range: Close (25 ft + 5 ft/2 levels)

Duration: 1 Day /Level (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

This forges a craft of raw elemental force. Earth creates a Mole Drill, which travels through dirt, rock, and stone at 30' per round. Air creates a Cloudship, which travels at 60' per round and comes equipped with catapults and ballistas. Water creates a Kraken Submarine, which travels underwater at 60' per round (and can attack as a normal kraken). Fire creates a Dragonship, capable of reaching orbit, which travels at 90' per round and can fire 10-die Fireballs once per

round. Each ship has a climate convenient for the caster and can travel along the land. The craft has DR 10/-, AC 10 (-8 Size, +8 Natural), 250 HP, and counts as a construct. It carries up to 20 passengers in comfort, or up to 60 in extremely cramped conditions.

Ties of the Blood

Divination, Enchantment, Necromancy

Components: V, S, M (the item used as a link)

Range: Special

Duration: 1 minute or 3 spells, whichever comes first

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

For this spell, the caster needs a material item with psychic or physical link to the target. A favored watch or piece of cloth the target has worn will do, but hair is better - and there isn't anything much better than blood. The caster can transmit level 4 and under spells to the target at any range, and across dimensional barriers. Especially good ingredients increase the spell level limit to 5, while poor ones reduce it to 3.

Higher-level variants can transmit higher-level spells at +2 spell levels per +1 level of the spells transmitted.

True Polymorph

Enchantment, Transmutation

Range: Short (25 ft + 5 ft/2 Levels)

Duration: Special (D)

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

Treat this spell as *Polymorph any Object* with a +2 bonus for duration calculations and a limit of 1000 cubic feet per level. It may also be used to manufacture up to 5000 GP worth of materials without any XP cost or other strain on the caster.

Eleventh Level Spells

Antitechnological Sphere

Abjuration, Enchantment

Range: Long (400 ft + 40 ft/Level)

Duration: One full day (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You set a specific technology threshold or principle. Technology which uses that principle or goes beyond that threshold fails to function. This does not affect the natural functions of creatures, though it might affect constructs. The sphere covers a 30 ft radius.

Apportion

Abjuration, Conjunction

Range: Medium (100 ft + 10 ft/Level)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Ref negates

Spell Resistance: Yes

Treat this spell as per *Teleportation without Error*, except that the caster doesn't have to travel, it will affect unwilling targets, and the weight limit is 250 lbs. per level.

Higher-level, or metamagically-modified, versions of this spell often throw in area-of-effect.

Danse' Macabre

Enchantment, Necromancy

Range: Medium (100 ft + 10 ft/Level)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

This brutal spell animates the skeletons of up to level/2 targets. Victims suffer a -10 penalty to all physical checks if they resist the caster's commands and can be made to take 1d4 hit points per round (unaffected by damage reduction) if the caster commands their bones to rip free. Outside of the fact that the flesh on them is still alive and protesting these are perfectly normal skeletons and can be Turned or Destroyed normally.

Detonate Life Force

Evocation, Necromancy

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Fort partial

Spell Resistance: Yes

The unfortunate victim detonates, causing 2x(current hit points) points of damage in a 30' radius. Yes, the target dies outright if they fail the save. If the target saves, his or her life force only partly explodes, dealing 4d6+8 (or his or her current hit points, whichever is

lower) damage in the same area. This spell does not affect creatures without an active life force, such as undead and constructs.

Great Channels

Abjuration, Conjunction, Transmutation

Range: Touch

Duration: One hour per level or until used (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The next three spells the target casts have a trans-dimensional range, as if modified by the Extension metamagic.

Interdict

Abjuration, Conjunction

Range: LOS (Touch for ritual version)

Duration: Special

Casting Time: One Standard Action or Ritual

Saving Throw: Will negates

Spell Resistance: Yes

The target temporarily loses access to a source of supernatural power. Common power blocks include gods (and therefore divine magic), particular planes (which may block negative energy attacks and the like) and arcane energies. This only lasts 1 minute per level if cast as a normal spell, but can easily tilt the odds of a fight. If it's cast as a Ritual the effect lasts for one week per Caster Level on a successful save and is permanent until some countermeasure is found otherwise.

Life Leech

Conjunction, Necromancy

Range: 60 ft radius burst

Duration: Four hours.

Casting Time: One Standard Action

Saving Throw: Fort half

Spell Resistance: Yes

This spell transfers 12d6 HP from each desired target within 60' to the caster as temporary hit points. While the caster can gain a maximum of 240 hit points in this fashion, the damage inflicted is not so limited. A target who makes his or her Fort save takes only half damage.

Mall of the Gods

Conjunction, Divination, Illusion

Components: V, S, M F (cash, gems, or other items to trade worth at least 10,000 GP)

Range: Personal

Duration: Instantaneous

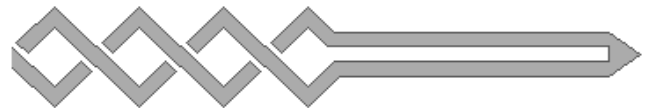

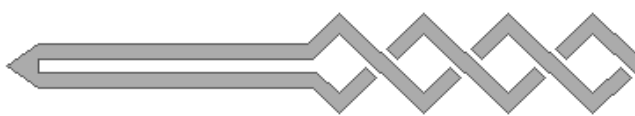

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You get an instant shopping run. You may spend up to 120,000 GP normally in cash or trade, but no item from the mall may ever be returned. No single purchase

may exceed 1000 GP per character level. This spell does not work until the 22nd level *Grand Opening of the Mall of the Gods* spell is cast in a given universe, but most places have had their malls open for eons.

Reforging

Illusion, Transmutation

Components: V, S, M (a toolkit suitable for working on an item of the desired form)

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Reforging alters the form of magic items, but not their magical function. It could turn a pair of bracers into a sword or a cloak or vice versa without altering the magical power of the item in question. It does alter which item slot it occupies, however, as well as all of its mundane statistics.

Runic Enhancement

Conjuration, Evocation, Transmutation

Range: LOS

Duration: One hour per level or until expended (D)

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

Specify up to +8 levels of metamagic. Add them to any other single spell which you cast during this spells duration.

A L13 version allows the metamagic(s) added to be selected when the second spell is cast.

Sight from Beyond

Divination, Enchantment, Illusion

Components: V

Range: Personal

Duration: One minute per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You gain a +20 insight bonus on AC, attacks, saves, and those skills where seeing the future would help. The character not only sees the future, he or she can scan through every possible future until the end of the spell, seeing which action results in what. This has no separate effect from the bonus and does not protect the caster from all error; there are limits to comprehension, if not to the spell.

Spellsharing

Conjuration, Enchantment

Range: Personal

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes (for caster and allies)

The caster (and only the caster) may share all single target spells cast on him or her with up to (Int Mod) allies with a 30' radius of effect if he or she so desires.

Spellweaving

Abjuration, Enchantment

Range: Personal

Duration: One hour (D)

Casting Time: One Standard Action

Saving Throw: None (Normal for the secondary spells)

Spell Resistance: No (Yes for the secondary spells)

You may manipulate the flow of magic around you to produce minor (L2 and under) spell effects. You may create such effects up to once per round, but cumulative effects such as *Cure Wounds* will only work 2d6 times on any single target. Secondly, your enhanced magical senses effectively grant you the Countermagic ability with the Reflexive improvement.

Higher-level versions of this spell increase the limit on the level of spells which can be woven by +1 per +2 levels.

Torim's Superlative Porter

Conjuration, Evocation

Range: Special

Duration: Special (D)

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: No

This spell creates a 20' cubic trans-dimensional space which exists only in relation to the caster (in effect it follows him or her about) along with quasi-intelligent unseen servants to manage it. The user merely holds out his or her hand and asks for an item or places an item in. This effect is permanent, but occupies one active spell slot until dismissed. Dismissing it dumps all objects on the ground. If the caster dies while this spell is active, it becomes a permanent hidden pocket dimension until he or she is resurrected (if ever).

Twelfth Level Spells

Anagathic

Abjuration, Necromancy, Transmutation

Components: V, S, M (a small mirror)

Range: Touch

Duration: Instantaneous

Casting Time: One minute

Saving Throw: Fort negates

Spell Resistance: Yes

The target does not age for the next week, whether from natural or unnatural causes. Alternatively, his, her, or its age may be reduced by one day.

As hard as it is to prevent aging, it's even harder to undo it.

Animate Implements

Conjuration, Enchantment

Range: LOS

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

A target item or set of tools gains competence or enhancement bonuses totaling +10 (usually +10 on any single skill or +5 each to hit and damage) and may act on its own as if the caster was wielding it. Thus a sword may be sent to fight, tools put to work on their own at a skilled task, or a wand given an extra +10 on Spot and left to guard your campsite.

Cloak of Grandeur

Illusion, Enchantment

Range: LOS

Duration: One full day (D)

Casting Time: One Standard Action

Saving Throw: Will negates (others only)

Spell Resistance: Yes (target only)

Everyone who encounters the target sees him or her as a figure of authority and great importance, to be obeyed without question, if they fail their saving throw. Variants exist: *Cloak of Normalcy* lets the target pass without attracting attention, *Just Sovereign* causes the local populace to accept even tyrannical incompetents as just and fair rulers, and *Cloak of Supremacy* allows the target to impersonate gods, rulers, and mighty heroes.

Characters who know one version may memorize and cast the others; they are all one spell, which allows the character to choose what aspect he or she wishes to present. *Cloak of Grandeur* is also as effective as mind-control gets, though a few more specialized spells exist.

Genetic Adaptation

Conjuration, Necromancy, Transmutation

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Fort negates

Spell Resistance: No

Two beings may produce healthy, fertile hybrid offspring regardless of species, age, sex (or lack thereof), or infertility if either has this spell in effect.

Some worlds have this spell as a World Template, thus neatly explaining where Genasi come from, given the obvious difficulties in the consummation of a relationship between a being of living fire (or water or earth or air) and a normal mortal.

Grand Creation

Conjuration, Transmutation

Components: V, S, possibly XP

Range: Medium (100 ft + 10 ft/level)

Duration: Instantaneous

Casting Time: 1 Standard Action

Saving Throw: Special

Spell Resistance: Special

Grand Creation allows the user to create nonmagical, nonliving, matter with a total value of up to 200 GP per level of the caster +5 GP per XP expended during casting. Such materials are real and permanent. If the materials are created around or directly above another creature it may make a Reflex save to avoid them. If an attempt is made to create items in contact with another creature - such as in a pocket, inside their armor, or to encase them in iron - Spell Resistance also applies.

A L15 version allows the creation of nonsentient living things. A L18 version allows the creation of magical items.

It's a bookmark. Why?

Grand Sphere of Invulnerability

Abjuration, Conjuration

Range: LOS

Duration: One minute per level (D)

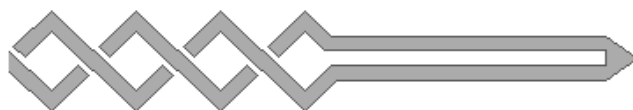

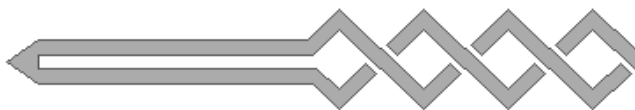

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

No spell up to level 8 can affect one defended by *Grand Sphere of Invulnerability*, unless they choose to allow it. The spell otherwise resembles *Lesser Globe of Invulnerability*.

Higher-level variants are even more potent. The L15 version protects against spells thru L10, the L18 version works against spells through L12, and so on.

Grandiose Inflation

Evocation, Transmutation

Components: V

Range: LOS

Duration: One minute per level (D)

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

This spell enlarges a target creature or object to Colossal size after a moment's delay. This is a nasty thing to do to a pebble before tossing it, since the resulting thousand-ton boulder will squash virtually anything (via entirely nonmagical physical damage) and gets a +20 on any to-hit rolls.

Great Dispelling

Abjuration, Conjunction

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

Treat this spell as *Greater Dispel Magic*, except as noted above and that you receive a roll of 1d20+ your level with no upper limit.

Greater Antimagic Field

Abjuration, Evocation, Transmutation

Components: V, S

Range: Up to 20 feet emanating from the caster

Duration: 10 minutes/level (D)

Casting Time: 1 Standard Action

Saving Throw: None

Spell Resistance: No

Unlike a standard *Antimagic Field*, a *Greater Antimagic Field* offers several different options and can be cast at higher levels than this; the spell automatically adjusts to the slot it occupies. Its shape is adjustable within the spell limits, from simply surrounding an item in the caster's possession up to the full 20 ft radius.

If cast to block all magic it follows the usual rule for antimagic - it can be overloaded and destroyed from the outside only by spells which exceed twice the level of the antimagic spell used. From the inside it requires a spell of three times the level of the antimagic effect.

If cast to dampen incoming supernatural effects only, it reduces the effective level at which such effects operate by twice the spell level. For example, a L12 antimagic effect would reduce the effective Caster Level of an incoming spell by 24. Thus an incoming Fireball spell with a Caster Level of 28 would only inflict 4d6 damage. Spells with their Caster Levels reduced to 0 or below simply fail. Such a ward will be overloaded and destroyed by any incoming spell with a Caster Level of more than three times the level of the antimagic spell used.

Antimagic may also be attuned to specific types of

magic. Such fine-tuned effects increase the effective level of the spell by one when used in conjunction with one of the other two options.

Prismatic Lance

Evocation, Conjunction, Illusion

Range: LOS

Duration: (Level/5) Rounds

Casting Time: One Standard Action

Saving Throw: As *Prismatic Spray*

Spell Resistance: No

Prismatic Lance creates a quarterstaff which lasts for (level/5 rounds). The staff shimmers with various colors brightening and dimming along its length and glows brightly overall (rather like a disco globe). Any creature struck by the staff (a touch attack) other than the caster suffers all the effects of *Prismatic Spray*. If thrown (with a range increment of 60') it dissipates after striking the target. Since the staff must already hit the target, the unfortunate victim receives no Reflex saves for any prismatic effects.

Prismatic Storm

Evocation, Conjunction, Illusion

Range: 150' cone

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: As *Prismatic Spray*

Spell Resistance: Yes

All effects of *Prismatic Spray* strike all targets in a cone 150' long. Targets do not receive Reflex saves, but may save versus other aspects of the Prismatic Spray.

The Prison of the Self

Abjuration, Enchantment, Illusion

Components: V

Range: Close (25 ft + 5 ft/2 Levels)

Duration: Permanent

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The Prison of the Self allows the caster to imprison a spirit or outsider within his or her own flesh and mind. While perilous, it's very effective: actual escapes are rare. However, the entity can use mental powers of level 4 or lower on its captor. If the caster is mentally but not physically incapacitated (not just sleeping), the entity can temporarily take over control of the body. If the caster dies, the entity will not only have the body, assuming it remains intact, but may well gain some of the caster's own power.

Relocation

Divination, Conjunction

Range: Special

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Moves up to a square mile of terrain, and all its inhabitants, to a new location of your choosing within range of a *Teleport Without Error* spell. The old location will "slide shut" to eliminate the hole left behind, while the new location's borders will fit smoothly.

The L15 version can move the territory across planes and adapt it to survive in its new location either by altering it to fit into its new environment or by setting up an environmental barrier around it.

Venom Cadavari

Evocation, Necromancy, Transmutation

Components: S

Range: LOS

Duration: Ten minutes per level (D)

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

Select a poison. The target becomes immune to all poisons and his or her flesh, breath, sweat, saliva, and blood becomes filled with the chosen poison. The user may opt to emit a toxic miasma in a 30 foot radius and may poison weapons, wells, food, and drink with a simple touch. A user bathing in a river is likely to cause illness and perhaps even a scattering of deaths among all

the communities downriver for several miles. While the target's flesh returns to normal after the spell expires, any venom he or she has released is real and permanent.

Warp Sphere

Conjuration, Illusion, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Special

Spell Resistance: No

Two target regions of space (each up to a 15' radius sphere) swap places. Characters with 5' of the edge receive a Ref save to dodge inside or out.

The L14 version allows a target area to be swapped with a target area on another plane. The L16 version throws in a Dimensional Anchor lasting one hour per level on each creature and object within the transported area after their arrival.

Web of Space

Conjuration, Illusion, Transmutation

Range: LOS

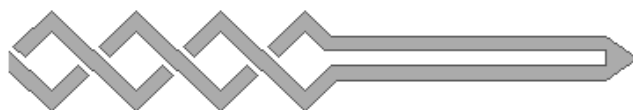

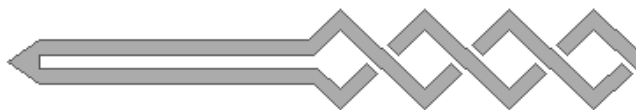

Duration: One day per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

Choose an area up to a 1000' radius. It becomes spatially bound. While characters may attempt to leave, whether physically or by occult means, they find themselves arriving on the other side. This does not affect light, but does affect all other energy including spells and psionic powers.

Wings of Magic

Conjuration, Transmutation

Range: Medium (100 ft + 10 ft/Level)

Duration: 1d6 Hours

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The target gains +24 CP to spend on *Path of the Dragon* abilities for the next 1d6 hours.

Similar spells exist for Channeling (Sphere of Light and Hand of Darkness at L15), Witchcraft (Waking the Serpent, L14), Martial Arts (The Stalker's Wheel, L13), and a variety of other ability sequences.

Thirteenth Level Spells

The Attentive Slave

Divination, Enchantment, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The victim of this spell will do as the caster desires without any need for orders. In effect, caster simply takes over control of the target. The target will continue to do what the caster would have wanted even if the caster dies, is dominated themselves, or is otherwise incapacitated. While the effect is instantaneous, targets with an inherent Will save bonus of +8 or more gradually revert to normal (the process normally requires 1d4 weeks) unless the caster occasionally reinforces his or her control. The caster is effectively limited to a maximum of (Cha Mod +1, 1 minimum) long-term servants.

Babe in Arms

Divination, Enchantment, Transmutation

Range: LOS

Duration: Special

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The target's mind is erased by this spell. While the mind (with skills and abilities) recovers at the rate of one effective year of life per week, the victim is extremely impressionable as a child would be during this period, and may be trained and taught as a child. This also allows a limited character rewrite (reallocating up to

25% of the targets character points).

If the target is of animal intelligence it can normally be fully domesticated and trained by the time it reaches "adulthood" for its species.

Dance of Blades

Conjuration, Enchantment, Transmutation

Components: V

Range: LOS

Duration: Five rounds per level

Casting Time: One Standard Action

Saving Throw: Ref partial

Spell Resistance: No

You surround the target with an aura of whirling force-blades. Any unwelcome entity which approaches the target within 20' or remains in that area takes 15d6 damage per round, unless they make a Ref save for half damage each round.

Dark Trinity

Conjuration, Necromancy, Illusion

Range: LOS

Duration: Special

Casting Time: One Standard Action

Saving Throw: As per specific effects

Spell Resistance: As per specific effects

You may invoke any three entropic effects (any Illusion, negative energy, darkness, or *Disintegrate* spells) of up to level 8. All three go off at the same time, although they may be independently targeted.

Dozens of odd variants - positive energy, Evocation, Illusion, weather effects, demon-summoning effects - exist, and a caster could develop many more.

Eternal Torment

Abjuration, Conjuration, Necromancy

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

This spell works as *Imprisonment*, but the victim is subjected to unending torment if he or she is in any way vulnerable to pain. If returned to the world, the target is stunned, nauseated, staggered, and fatigued and has half his or her hit points in subdual damage. These flaws go away in that order at the rate of one a week.

Evolution

Enchantment, Transmutation

Components: V, S, MF (creatures to be bred)

Range: Special

Duration: Special

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Select a species or subspecies. Over the course of

several generations, you may work to breed desired attributes and abilities into up to a hundred of those creatures who are under your control.

Drastic changes (such as giving Gnomes six arms and innate *Fireball* spells) may take repeated castings and may affect abstract game terms such as increasing the level cost to play one. Less drastic changes, such as breeding a subtype of horses which can eat seaweed and drink salt water for use on rocky islands, can usually be completed within a single generation.

In any case, such modifications become a natural part of your new species or subspecies from then on.

Fist of Insert Preferred Deity's Name Here

Conjuration, Evocation

Range: LOS

Duration: 1 Round /Level (D)

Casting Time: One Standard Action

Saving Throw: Ref half (per strike)

Spell Resistance: No

Named by an eccentric spellcaster who forgot the brackets, *Fist of Insert Preferred Deity Name Here* creates a giant hand of force that slaps a 30' radius area for 12d6 damage or punches a single 5' square for 20d6 damage. The caster may select a new target each round. It lasts 1 round per level, but that's often enough. Any target which makes the save take half damage.

Gates of the North Wind

Evocation, Necromancy

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Ref half

Spell Resistance: Yes

You hurl a 30d6 cold damage frostball. Any slain by this are animated as if by a Caster Level 15th *Create Undead*. Any target which makes the save takes half damage, but if they die anyway will still be animated.

The Hidden Ways

Divination, Enchantment, Illusion

Components: S

Range: Touch

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: Special

Spell Resistance: No

All alarms and traps the target would otherwise trigger overlook the target's presence if they fail the saving throw (they receive one even if unattended). All guards, construct or otherwise, must make a Will save or simply ignore the target. This effect fails if the target actively tampers or attacks with the alarms, traps, or guards in question. Affected alarms, traps, and guards do not remember the intrusion after the spell wears off, although guards which it fails to affect can detect the target normally.

Greater Familiar

Evocation, Enchantment, Transmutation

Range: None

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

The user may create a Companion or Mount (bestow the Familiar template or Paladin's mount abilities) from an agreeable creature with a CR of up to one-half the caster's level.

If you don't stop pooping down my back, I'm replacing you with clockwork.

Plague Arcane

Abjuration, Necromancy, Transmutation

Range: LOS

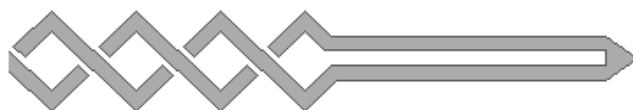

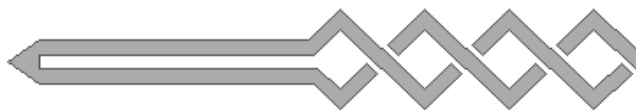

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

Choose a magical disease to affect up to ten targets within range. Such "diseases" include any outright magical infection, lycanthropy, possession by an evil entity (or possibly good ones for already-evil creatures), or loss of access to an arcane school. Outside of outright possession such diseases are contagious, and can spread. This spell can generally be countered by the reversed 13th-level spell *Cure Arcane Plague*, fittingly enough. If not so cured affected creatures may be cured normally via fortitude checks, specific curatives, or whatever other means the Game Master specifies.

Scrying Maze

Divination, Enchantment, Illusion

Components: S

Range: None

Duration: One day per level (D)

Casting Time: One Standard Action

Saving Throw: Will partial

Spell Resistance: No

Once cast, this spell wards a 100 foot radius of the target against clairsentience, scrying, astral intrusion, and other divinatory effects of less than tenth level. Anyone who attempts such an intrusion and fails the saving throw finds their mind drawn into a crystal maze on the astral plane. This takes them at least one day to escape. They may attempt a new saving throw each day until they escape or the spell ends. Hopefully someone will have been taking care of their bodies. Those who make the saving throw still alert the caster to their presence.

A *Scrying Maze* placed on a location may be made permanent at the cost of 10,000 XP.

Shattering Word

Evocation, Necromancy, Transmutation

Components: V

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: Yes

You may disrupt the structure of space around a target, crushing matter and scattering energy with a word. Any target with a CR of up to (Casters CR - 6), including creatures, traps, walls, gates, buildings, and spells, will be destroyed or damaged at the option of the caster. Targets with a CR above the destruction limit will still suffer 15d6 damage.

The Game Master may opt to modify the caster's CR according to his or her current condition. If the caster is currently low on spells, badly hurt, and short of gear, he or she may find that such distractions weaken the effects of a Shattering Word.

Spell Bank

Conjuration, Evocation

Components: V, S, MF (item to be imbued)

Range: Touch

Duration: Permanent until used (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You may store up to a number of spells in an object equal to your spellcasting attribute modifier. You may release one each round as a Free Action. You may give this item to other and split the spells between multiple items, but may not exceed the above restriction on the number of spells for all such items together.

Synthesis

Schools: Evocation, Transmutation

Components: V, S, MF (materials to be manipulated)

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Synthesis allows you to manufacture matter. It can create any molecular composition for which you have the appropriate atoms (or the local equivalent) available. This produces up to 10 pounds of material per Caster Level.

Unleashed Potential

Abjuration, Evocation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Ref negates

Spell Resistance: Yes

Unleashed Potential triggers the uncontrolled release of energy from something, usually an item with charges. GM's may allow this to work on characters; in either case, all charges or uses of a selected ability activate at once; if they require a target, they strike the holder or the square he or she stands on (multiply the affect and area, if any, by the *square root* of the number of charges or uses. It does not work on the nuclear or total-conversion potentials inherent in normal matter, but quantities of chemical or radioactive nuclear fuels (up to several thousand tons) work quite nicely.

Unseen Horde

Divination, Conjuration, Transmutation

Range: Special

Duration: One hour per level (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You create (Int Mod) x 100 unseen workers. These act as unseen servants, except that they have 18's in all physical attributes and mental attributes of 12, move at 30 feet per round, and get any three physical skills at +12. You may also equip them with (equally unseen) tools or weapons as needed.

Like regular unseen servants, these can be killed readily. They have 12 hit points and AC 22 (+4 Dex, +4 natural armor, +4 invisibility).

Fourteenth Level Spells

Altar of Blood

Enchantment, Necromancy

Components: V, S, MF (altar or structure)

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Altar of Blood transforms an altar or structure into a nexus of evil and a storage point for magical power derived from blood sacrifice. Each intelligent being slain on the altar contributes (CR/2 -1, rounded down) levels of spell energy to the reserve. Lower-level creatures can be sacrificed in groups to raise their effective CR and the fresh life energy of a small child is always worth at least 1 level of spell energy. Spellcasters who have personally sacrificed at least one sentient being at the nexus may draw on those spell levels as if they were using spell levels from a Rod of Absorption. Unfortunately, for every 100 spell levels a caster draws from the reserve, he or she suffers some minor deformity or curse which can only be removed via *Wish*, *Miracle*, or similar high-order spells.

Any undead created or "blessed" by you or an evil cleric (such clerics use a turning attempt to do this) at the sacrificial site gain +4 hit points per hit die. Additionally, the sacrificial site radiates *fear* and despoils the land for miles around, though this has no effect on creatures above four hit dice or levels.

Annihilation

Conjuration, Evocation, Necromancy

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Best saving throw of Fort, Reflex, or Will negates

Spell Resistance: No

Annihilation crushes the target's body, turns it to subatomic particles (or whatever), spreads them across the universe, and then grabs the target's soul and drags it as far as magic reaches before flinging it further. This is as final as death-type spells get. If the target comes back from this, you probably need to just agree to disagree. Most souls hit by this are simply trapped in a limbo until they fall into another universe.

Construction

Conjuration, Divination, Transmutation

Components: V, S, M (construction materials)

Range: Extreme (800 ft + 80 ft/Level)

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Using available materials (wood and stone are best for medieval construction, but the spell can incorporate metal, rubber, brick, or any other suitable material) this spell creates any structure up to a fortified keep, bridge, cathedral, or 20 miles of road.

Forge of Time

Abjuration, Evocation, Transmutation

Range: Medium (100 ft + 10 ft/Level)

Duration: One hour per level (Permanent as ritual) (D)

Casting Time: One Standard Action or Ritual

Saving Throw: Special

Spell Resistance: No

You create time-stopped areas and "items" customized to your whim. Areas and items appear as perfectly reflective surfaces, although they may be either "solid" or "hollow" (in which case time continues normally inside them; only an infinitely-thin wall exists). Such items are unbreakable by physical force. Only magic-absorbing or dissipating attacks or time control techniques can undo them.

All items created must fit within a 20 foot cube and may not include portions of living creatures; it's all or nothing. If the caster attempts to entrap a living creature it may make a Reflex save to avoid being chained, caged, or otherwise entrapped.

Grand Projection

Conjuration, Enchantment, Illusion

Range: Touch

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

This spell resembles *Project Image*, but can transmit all sensations and sounds to or from the target, allows the user to cast spells of up to eighth level through the image, and provides a constant Telekinesis effect which allows the user to affect physical objects as if he or she was actually present with a Strength equal to his or her Intelligence. The image can be projected to any point on the planet.

A L16 variant can project the image to any place in the same dimension. A L18 variant can project the image across dimensions as well.

Holding Thunder

Conjuration, Evocation, Transmutation

Range: Special

Duration: 1 Day /Level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

When cast, *Holding Thunder* also activates another normally-instantaneous spell of up to 6th level which you have memorized or can spontaneously cast. The second spell will remain continuously active for the duration of *Holding Thunder*, assuming that this makes

some sort of sense. Damaging effects typically apply each round to anyone who enters or remains in the affected area, while spells such as “bless water” are effectively cast each round.

Inner Thunder

Evocation, Necromancy

Components: V

Range: 30 ft radius burst emanating from the caster

Duration: Instantaneous

Casting Time: One Swift Action

Saving Throw: None

Spell Resistance: Yes

You radiate a 20d6 forceblast. All Force constructs and spells within that radius are automatically destroyed (no save). All those within 10’ are hurled away to a radius of 40’. The spell has a built-in version of Advanced Body Fuel; the caster may spend 14 hit points instead of actually expending the spell to cast it.

Mana Vortex

Conjuration, Evocation

Range: Touch

Duration: 1 Round /Level (D)

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

This spell provides 4 bonus Mana for the target (may be the caster) every round for 1 round per level. This cannot be used to regain personal Mana, but it can be channeled into spellcasting or other effects.

Shattering

Divination, Conjuration, Evocation

Range: 200 ft radius burst emanating from the caster

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

Shattering destroys 20d6 CR worth of barriers, traps, vaults, constructs, and other obstacles within a 200 ft radius burst. Weaker and closer targets are affected first. Targets with 20+ CR individually are not affected and do not count against the total.

Wall of Sorcery

Evocation, Transmutation

Range: Long (400 ft + 40 ft/Level)

Duration: Permanent (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

This creates a potent and permanent *Wall of Force*. Those who touch it become subject to a spell up to 5th level which you know and can cast. *Hold Monster* is the favorite choice; it will activate on the target every round, so to successfully evade it after touching the wall, the target must make a great many saves in a row. Most don’t live that long.

Higher level variants can increase the level of the secondary spell; L6/7/8/9 secondary spells can be used at L15/17/19/21. It’s worth nothing that the secondary spell can be a metamagically-modified effect if the caster knows the metamagical technique in question.

Wandbane

Abjuration, Divination, Evocation

Range: 10 ft/Level radius emanation from caster

Duration: One hour (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

Wandbane blocks the release of stored spells from spell-trigger, spell-completion, and command-word items within a radius of 10 ft per level of the caster. Uses-per-day and unlimited-use items are not affected.

The L18 variant King of Wands grants awareness of each attempt to release a stored spell in the affected area and the ability to selectively veto such releases, allowing the caster and his or her friends to use stored spells while preventing enemies from doing so.

Whispering Winds

Divination, Enchantment, Illusion

Components: V

Range: Special; anywhere on the plane

Duration: 2d12 days (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

With this spell, you may spread rumors and ideas throughout an entire province. Against susceptible individuals, this may be treated as a *Suggestion* effect, but given the sheer number of affected people, it likely won’t matter. This can be used to cause unrest, promote ideas, advertise products, promote your reputation, subvert nations, spread hope or despair, and so on.

Fifteenth Level Spells

Divine Spark

Conjuration, Evocation, Necromancy, Transmutation

Components: V, S, MF (a realm to claim)

Range: None

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

You may purchase the Godfire Dominion ability without inheriting it, the aid of a god, or fulfilling any other story based requirements.

Evil Eye

Conjuration, Evocation, Enchantment

Components: V

Range: Personal

Duration: 2 Rounds /Level

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: Yes

Choose a spell of up to level 6 to use as a gaze attack with a 60' range. While offensive spells are traditional, this is not required. If you're passing through a plague-ravaged village and want to *Heal* everyone who meets your gaze, this is quite permissible.

Forest Haven

Enchantment, Transmutation

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Every plant and animal within 1 mile per level of the caster becomes a friendly, communicative ally. The spell includes the ability to speak with all plants and animals (to the extent their limited capacities allow) within that region, an effect which persists as long as the target accepts the task of taking care of the area. The target will never lack for herbs, spell components, or food within the area as long as the environment is half-way reasonable to begin with.

Forge Avatar

Conjuration, Enchantment, Necromancy, and Transmutation

Components: V

Range: Touch

Duration: One hour (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

Forge Avatar merges a group of 2-7 volunteers into one. The merged entity's attributes are equal to the highest base attribute in the group +2 for each member

past the first, its saves use the highest base in the group plus one per member past the first, and it gets the groups total hit points. The avatar has all the best talents, magic levels, Warcraft, and other abilities from the pooled characters, and gets its choice of their equipment as well. Finally it gets one extra action per round per 2 people in the group and meets any and all requirements that one of the group members met. In other words, if a magic item or ability requires elf-blood, and one member out of the group is an elf, then the Avatar meets that requirement.

Strangely, this spell sometimes comes bound into giant golem bodies, which the characters must pilot. Obviously, this is the result of a poorly-thought design; any good construct ought to be able to act on its own.

Ka Effigy

Divination, Enchantment, Necromancy

Range: Close (25 ft + 5 ft/2 Levels)

Duration: Permanent (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: Yes

Ka Effigy creates an exact duplicate of the caster (and only the caster) at three-fourths of his or her current level. The duplicate is fully real and comes with appropriate gear for its level, although this vanishes with it. The Effigy lasts until killed, but the user is at -2 levels while the duplicate remains. The Ka Effigy transmits all its memories, experiences, and any XP it has earned to the caster when the spell ends or it dies.

The Opening of the Ways

Divination, Conjuration, Transmutation

Components: V

Range: None

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

Also known as *The Hand of Ptah*, this spell opens all gates, tunnels, doors, locks, seals, and barriers you can see or know about within a 1-mile radius. It will even rebuild small cave-ins and reveal hidden passages, if you have some idea of what you're looking for. It can open any and all magical seals up to 12th-level effects.

Prismatic Armor

Evocation, Illusion

Range: Touch

Duration: 10 minutes per level (D)

Casting Time: One Standard Action

Saving Throw: Special

Spell Resistance: No

Prismatic Armor has the effect of *Prismatic Sphere* but only affects those who come into contact with the wearer. The wearer casts spells as if they were cast through a *Prismatic Sphere*. The user may use touch attacks to body-slam people with the armor, which they

are unlikely to enjoy, although the usual saves apply to reduce the prismatic effects.

Prosperity

Evocation, Necromancy, Transmutation

Range: Anywhere on the planet.

Duration: One Season (usually used during the fall. Three months for regions without seasons.)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Prosperity blesses a province - a fair-sized country or major chunk of an empire - with fertility and health, ensuring healthy flocks and herds, bountiful crops, and plenty of wild game. The people will flourish and grow fat. This spell may be cast reversed, in which case it causes blight, disaster, and famine. Individual farmers and herdsman may make Will saves against the reversed form to protect their own lands and animals, but no general save applies unless the local ruler is bound to the land (see *Coronation*, page 124) or possesses the relevant Dominion or Domain abilities.

Righteous Wrath

Conjuration, Enchantment, Necromancy

Range: Long (400 ft + 40 ft/Level)

Duration: One hour

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You sanctify the area. This short-term burst of holy power creates a *Holy Aura* effect over a 300' radius. Additionally, undead and evil outsiders inside the effect

take 3d6 holy damage per round and cannot be created or summoned in the area. The caster may describe up to three additional spells (level 4 maximum) which affect the chosen area or those in it. Sadly, the spell requires the support of a faithful community inside the zone of effect; normally it only is used by deities slightly irritated by an evil horde or swarm of undead come to sack the temples of the just.

Spatial Soliton

Conjuration, Evocation

Components: S

Range: Special; originates adjacent to the caster.

Duration: Instantaneous (technically 12-48 hours since the beam only travels at near light speed)

Casting Time: One Standard Action

Saving Throw: Reflex half

Spell Resistance: No

You fire a shaped gravity pulse, a relativistic stream of microscopic black holes. This causes 12d6 points of damage to everything in a 5' wide (and high) pathway many light hours long, bypassing all defenses save for gating away the stream or not being there. This includes cover (walls, mountains, stars or anything other than a bigger black hole), time-stopped areas, force walls, armor, damage reduction, immunities, and resistances. Fortunately for the rest of the universe, the beam does gradually dissipate, losing 1d6 of its damage potential every 1d4 light hours (generally there's no need to check). If a Soliton beam passes through a *Gate* effect, the beam dispels it en route if the caster succeeds in an opposed Caster Level check.

The Triune Self

Enchantment, Transmutation

Components: None

Range: Touch

Duration: Ten minutes per level

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

The targets mind becomes three minds, although they draw on a common pool of spell slots, power, and other resources. One mind acts physically, doing physical actions and attacks, and feeling pain. The other two may use magical or psychic powers or speak (the spell provides for that supernaturally), essentially giving the user three actions for each one he or she would normally get. He or she also gains three saving throws against any mental effect, which generally includes all Will saves.

Note that this spell does not make any changes to the user's body; he or she can still cast only one spell per round that requires gestures without using special techniques, and if the physical self begins staff-fighting, the mental selves may have no hands left over to gesture with.

Many users combine this effect with Alter Self, so as to provide more limbs. This works perfectly well.

The Venom'd Flood

Conjuration, Necromancy, Transmutation

Components: S

Range: Long (400 ft + 40 ft/Level)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You spray up to 1500 cubic feet per level of any fluid selected. Normal materials, such as whipped cream, olive oil, or boiling water are permanent. Exotic materials, such as liquid helium or molten gold last only level/2 rounds. The spray itself may be directed at a square or hex, in a 5' wide or 10' wide stream, in a cone, or at an arc of squares or hexes within range at the option of the caster. Similarly, the spray may be discharged in a single round or over up to ten rounds at the option of the caster.

Sixteenth Level Spells

Brisnell's Final Thievery

Conjuration, Divination, Transmutation

Components: S

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Ref special

Spell Resistance: Yes

Every item the target carries or wears must save or be teleported to the caster. The caster may exempt items he or she doesn't want, since the spell provides the list as it transports everything.

Celestial/Infernal Crown

Conjuration, Enchantment, Transmutation

Range: Close (25 ft + 5 ft/2 Levels)

Duration: One hour per level (D)

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

You become a true celestial or infernal entity for the duration, gaining a doubled-up (double the attribute bonuses and spells per day) version of the Half-Celestial or Half-Infernal template. Sadly, the user takes on the Outsider type as well, and so becomes vulnerable to banishment, holy or unholy water, and spells or powers which target outsiders for the duration. Any items which rely on a mortal racial heritage, such as an elf-specific item, will not function for the duration.

Chain the Cataclysm

Abjuration, Evocation, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You prevent or halt an earthquake, volcanic eruption, flood, landslide, hurricane, or other natural disaster in a radius of 1 mile per level, dissipating the forces that drive it. While another eruption, storm, or earthquake may occur later, it will not be for some time.

Disciples of Power

Divination, Enchantment, Illusion

Components: V, S, 1000 XP per minion

Range: Close (25 ft + 5 ft/2 Levels) initially. Once set up, the link has transdimensional range.

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

You may create a permanent link with up to (Cha Mod) +7 voluntary subjects. This will permit you to tap into their senses, speak to and through them, and to channel spells of up to L9 through them at will regardless of range or dimensional barriers.

Envenomed Darts

Conjuration, Evocation, Necromancy

Range: Extreme (800 ft + 80 ft/Level)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Special

Spell Resistance: Yes

Envenomed Darts hurls 24 magic missiles at the target, each of which can carry one of your daily 4th level (or less) spells or a poison provided by you. Targets receive saves only against the carried spells and poisons.

Eternal Banishment

Conjuration, Enchantment, Evocation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Ref negates

Spell Resistance: Yes

You send the victim (1d4+1) x1000 years into the future or to a random dimension from which the target cannot normally escape. Of course, any target likely to be targeted by a 16th level-spell probably has highly unusual options in either case, and just might find a way back. Even if they do, however, it will probably take them quite a lot of work.

Light of Truth

Conjuration, Divination, Evocation

Range: Personal

Duration: Ten minutes per level (D)

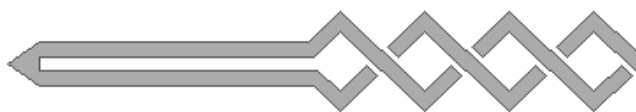

Casting Time: One Standard Action

Saving Throw: Special

Spell Resistance: No

Light of Truth grants the caster a +30 circumstance

bonus on Decipher Script, Search, Sense Motive, Spot, and most Diplomacy checks by enforcing the absolute and awesome truth around him or her. It also dispels all illusions he or she can see (attended ones receive Will saves) and automatically blinds all evil beings unless they make a Fortitude save.

Maze of Doom

Conjuration, Evocation, Illusion

Range: Long (400 ft + 40 ft/Level)

Duration: Special (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Much like the *Maze* spell, *Maze of Doom* transports up to 6 targets within a 30 ft radius into an extra-dimensional maze of shifting force-planes. Unlike a *Maze* spell, the labyrinth is filled with 4d6 deadly traps and monsters. Each trap or monster may will have a CR of 15 to 20 (1d6+15), and while creatures are not actually alive or intelligent, they act sufficiently like it to fool almost any observer. The targets may make DC 24 Int check to escape after each trap or monster is successfully dealt with instead of every round, as they would in a *Maze* spell. If the supply of traps and monsters is exhausted, any surviving victims escape automatically.

Mindworm

Enchantment, Necromancy

Range: Long (400 ft + 40 ft/Level)

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The caster gains total control over the victim's mind and even metabolic functions, and may transmit spells up to level 6 through the target, as well as tap into the target's senses. Victims with 5 or fewer hit dice are permanently bound regardless of the normal duration.

Sacrificial Transference

Conjuration, Enchantment, Necromancy

Range: Touch

Duration: Permanent

Casting Time: Ritual

Saving Throw: None

Spell Resistance: Yes

This vicious spell transforms its victim into a small statue or talisman and links it to the caster. Until the victim dies, he or she takes all damage, attribute drain or damage, negative status effects, or level drains that would otherwise affect the caster. While the victim can be saved (and the spell ended) by using a *Wish* to return the victim's body to normal and *True Resurrection* to return him or her to life, it's much easier to simply destroy the talisman or statue, even though it has hardness 20, 50 HP, and saves as per whoever it was

made from. Furthermore, if the statue is destroyed, the caster takes 50 points of damage. A spellcaster can only have one Sacrificial Transference spell in effect at any one time.

For those using Ties of the Blood, or similar effects, the statue makes an absolutely superb link to the caster. Not only is the level of spells which can be transmitted over such a link increased by +2, but the caster saves at -10 against any spells cast by someone in possession of the statue.

Sphere of Life

Conjuration, Evocation, Transmutation

Range: Extreme (800 ft + 80 ft/Level)

Duration: 2d4 Years

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You create a fertile oasis complete with air, water, and light over a 50' radius per level. It lasts for 3d4 years and works nicely even in a complete vacuum, deep underground, or a demiplane of endless infernos.

Tale-Spinner

Enchantment, Illusion, Transmutation

Components: V

Range: None

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: No

You implant detailed memories into the minds of all desired targets within the range of your voice. The caster may spin any tale he or she wishes to make a part of the targets' memories. Such memories are so vivid and real that the targets can actually gain experience from them if the caster chooses to tell tales of adventures, battles, and challenges overcome. Sadly, this is subject to a limit of 2d6x100 XP per casting and a lifetime limit of 7000 XP for any given target.

Timejump

Conjuration, Evocation, Transmutation

Range: Medium (100 ft + 10 ft/Level)

Duration: One round or Concentration (up to one round per level)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

This opens a circular gate 5 to 20 feet across (at the option of the caster) through time and space. While superficially similar to a normal *Gate*, time is trickier than space and dimensions. Travel into the past is an iffy proposition if it's possible at all. The Game Master is free to require Int checks to target the spell, may drop travelers into existing roles in the past or alter them to fit in, and may or may not allow modifications to the "real" past or the creation of new timelines.

And even the gods may not know if your information about what was really going on in the past is correct in the first place. History is rarely really as it was reported.

Virtually every world, however, allows travel into the future. Whether it's THE future, and so inevitable, or whether it's only a possible future and the characters can return to the past and change it, is up to the Game Master.

Tithe

Conjuration, Illusion, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

Tithe restocks all armories, larders, and dry goods stores for an outpost, temple, mansion, fortification, or other large dwelling. This also renews minor special substances such as holy water or flaming oil (presumably not flaming when it arrives) and repairs all damage to the structure.

The user is automatically teleported up to 30 ft away whenever attacked. Any individually targeted attack or effect has a 5 in 6 miss chance. Area effects have a 4 in 6 miss chance if there's a spot within range that would be outside the area of effect, the spell is ineffective if no such area is available. The user never winds up in a dangerous location due to evasive teleportation and may control the spell enough to start their turn on each round in any location within 60 ft of their final location last round.

Genetic Reconstruction

Divination, Transmutation

Range: Medium (100 ft + 10 ft/Level)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Fortitude negates

Spell Resistance: Yes

The caster may arbitrarily rearrange genetic structures throughout the target's body; an advanced and extensive knowledge of biology is *highly recommended*. Supplementary divinatory spells are common, to ensure it all will work out as planned.

Seventeenth Level Spells

The Dark Hordes

Conjuration, Enchantment, Necromancy

Components: V, S, M (an appropriate offering)

Range: LOS

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

The Dark Hordes summons and binds up to 36 CR worth of infernal beings (maximum 9 CR each). They must serve the caster obediently in all things for a year and a day. The powers of the underworld may notice and harass the caster, demand payment, or even attack him or her outright (assuming they think they can defeat a caster this powerful).

A good variant exists, and summons up 48 CR worth of celestials with a 12 CR maximum apiece, but these serve only at their personal whim and aren't bound to obedience.

In either case, no single caster may call forth more than (Cha Mod) Hordes at any one time.

Evasive Tesseract

Abjuration, Divination, Conjuration

Components: Mental only

Range: Touch

Duration: One round per level (D)

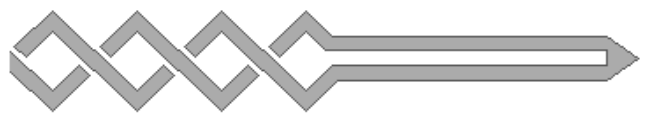

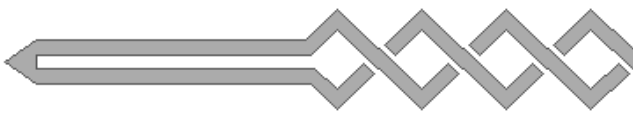

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

I'm... too sexy for my mail.

Geologic Mastery

Enchantment, Evocation, Transmutation

Range: LOS

Duration: 10 minutes per level (D)

Casting Time: One minute

Saving Throw: None

Spell Resistance: No

You gain vast telekinetic powers over earth and stone. You may create a volcano or mountain, cause earthquakes covering miles upon miles of terrain, or open crevasses with a thought. While this isn't really suited to small-scale destruction the user may opt to simply create the effects of an *Earthquake* spell each round.

Inquisition

Enchantment, Illusion

Range: None

Duration: Permanent (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You create an occult secret police throughout a province. You may spread rumors, give citizens a constant awareness of being watched, automatically know of almost any activity of note in the area, and gain a +20 bonus on any actual Gather Information checks.

Pillars of the Temple

Conjuration, Evocation

Components: V, S, relevant DF (even if arcane caster)

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

A building, structure, or entry becomes a permanent pathway into a chosen divine realm. This generally results in it being occupied as an outpost of that realm and thus gaining some guardians. Priests of the god in question gain two clerical magic levels while within one mile of the structure, and the location is automatically *Hallowed* or *Unhallowed*. Unlike the basic *Hallow* and *Unhallow* spells such a temple can support up to three secondary spell effects; these are often provided by the deity in question and thus may surpass normal limits.

If a structure has already has this spell cast upon it, repeat castings fail. Despite occasional attempts, this cannot be cast on a structure which is occupied by forces opposed to the deity in question. In fact, it can only be cast on a location which has been ritually purified and prepared for the opening of such a gate.

Master of Space and Time

Abjuration, Conjuration, Divination, Evocation, Illusion

Range: Personal

Duration: One hour per level (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

The caster may walk across space and time, leading as many others as he or she cares to (this can stretch into moving whole a plane's population if they all follow the leaders). The user simply casts this spell and begins walking; the company will move through a series of odd dimensions and demiplanes to the targeted area, with the transitions always seemingly more or less gradual.

If this is combined with the appropriate Rider talents the caster can lead watercraft, spaceships, and high speed land vehicles as well. Without such enhancement the user is limited to leading walkers, riders, and animal-drawn vehicles.

Reforging

Divination, Evocation, Transmutation

Components: V, S, MF (tools appropriate to the item to be repaired)

Range: None

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Reforging repairs broken, disenchanting, or otherwise damaged magic items of non-epic status. It also restores all charges on charged items which produce effects of up to level 7.

Song of Orpheus

Divination, Enchantment, Illusion

Components: V

Range: Personal

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: No

You gain total emotional control over all targets who fail the save in a 60' radius per level and may manipulate their feelings in any way you wish at will. You may even kill mortal targets or drive them insane through intense emotional trauma if you wish. Immortals cannot be slain by emotion, but may be driven into deep depression or otherwise manipulated.

Spiritual Transformation

Conjuration, Transmutation, Enchantment

Range: Touch

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

The target is permanently transformed into another kind of creature, such as an outsider, Nature Spirit, or even a Realm Spirit. This spell pays for up to 5 levels worth of templates or monster levels and can be cast in

advance, to take effect when dying. Unfortunately, it may take several years for the user to fully adapt to his or her new status. In effect, the target is out of action until the campaign catches up enough to make them an acceptable character again. Of course, by the time anyone is fooling around with seventeenth level spells, the Game Master may not care...

Temporal Stabilization

Conjuration, Divination, Evocation

Range: Personal

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You render yourself and any desired creatures or objects within a 30' radius immune to the next reality-altering event caused by individuals tinkering with the past.

The Ultimate Counterspell

Conjuration, Evocation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: No

You break cancel, or counterspell any other spell or effect up to level 21 magic, provided it does not require special means, such as a quest. Alternatively, you can dispel up to a dozen lesser effects (spell level 10 or less).

Youth

Enchantment, Necromancy, Transmutation

Range: Close (25 ft + 5 ft/2 Levels)

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Fortitude negates

Spell Resistance: Yes

You rejuvenate the target, granting another 70 years of life. If the target isn't well past 70 years old, he or she returns to a just post-pubescent state and the remainder is added to his or her natural lifespan. Repeated castings stack infinitely. The target resumes aging normally after the spell is cast.

Eighteenth Level Spells

Blood River

Enchantment, Necromancy, Transmutation

Range: Affects any location on the planet.

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

All water, plants, and animals within a country or province becomes poisonous with a user-chosen venom;

each creature gains immunity to the venom it produces. If all are keyed to different venoms, most of the species will die off (very) soon, leaving only the hardiest and most desperate creatures. Either way, it's very dangerous.

Variants on this spell can be used to adjust the plants, animals, and environment of a province in a variety of other ways. For example, if a mighty series of volcanic eruptions was rendering the country uninhabitable, a spell of this sort could adapt the plants and animals to survive happily amidst a rain of molten rock.

Civic Benefactor

Conjuration, Enchantment, Transmutation

Range: Affects any location on the planet

Duration: One year

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Choose a city; its production, trade, rate of growth, and revenues double. It gains excellent public health, waste disposal, firefighting, police, and other public services and the effects of *Cure Light Wounds* apply to every citizen in it up to once a day as needed by the individual. In general, the people become quite content.

Cosmic Awareness

Divination, Enchantment, Conjuration

Range: Personal

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You analyze everything on the entire planet. Any and all locations hidden by divination protection are noted, along with their exact shape, power, and scale. While this spell doesn't cut through any divination protection, it tells the user what kind of effect (personal spell, magic item) is active. Secondly, you may make an one Intelligence-based check with a +40 insight bonus on the roll or gain brief (but 95% accurate) answers to any seven questions you choose to ask the Game Master provided that the desired information isn't protected by antidivination magic. Sadly, this does not guarantee that your questions will be good ones. Thanks to the immense mental strain of such cosmic knowledge, this spell cannot be used more than once a week.

Flask of Solomon

Conjuration, Enchantment, Evocation

Range: LOS

Duration: Instantaneous

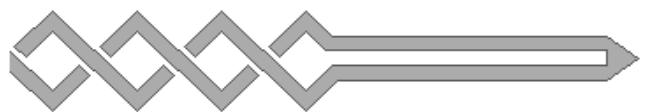

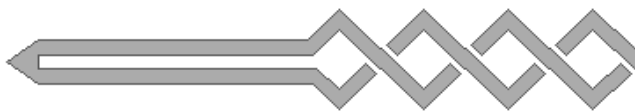

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

You trap the target or targets with a 5' radius of your spell in a tiny, timeless pocket dimension, normally placed within a gem, bottle, or crystal for safekeeping.

Planar Seal

Conjuration, Evocation, Illusion

Range: Special

Duration: 1 Day /Level (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You enact a global-scale *Dimensional Anchor*, which affects all creatures and objects whether they are coming or going, for the duration. A great many supernatural beings are likely to be annoyed by this.

Sphere of the Archmage

Divination, Enchantment, Evocation

Range: Personal

Duration: Ten minutes per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You gain complete and detailed knowledge of all spellcasting and magical effects within 50' per level, and may use *Greater Dispelling* reflexively against any of which you disapprove.

Summon Personification

Divination, Conjuration, Enchantment

Range: Close (25 ft + 5 ft/2 Levels)

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You call up the personification of a natural force or concept, such as Winter, Sea, Death, Order, Gravity – anything. You can converse safely, though the spirit cannot be compelled or damaged. It remains to talk for at least five or ten minutes and will be reasonably friendly, but you can't actually compel it to go away unless you cast this spell again in reverse.

Most such forces have no awareness of human-scale events, but have an absolute knowledge of their force or concept and can inform the caster of many strange events or changes related to its nature. Gravity, for example, could locate or describe a Black Hole and tell if someone has been using magic to travel through one, teach gravity-related magic, or turn aside an onrushing neutron star (if you can persuade it that something as trivial as the destruction of a solar system is important for some reason).

Some entities - such as Death - are uncomfortably aware of human-scale events. In many ways this can be harder to deal with than the reverse.

True Shapechange

Conjuration, Necromancy, Transmutation

Range: Medium (100 ft + 10 ft/Level)

Duration: 10 Minutes/Level (D)

Casting Time: One Standard Action

Saving Throw: Fortitude negates

Spell Resistance: Yes

This spell works as per *Shapechange*. While still limited to generic forms, you gain all supernatural powers up to level 6 effects and spell-like powers up to level 8 effects. All your items are adapted to the new form.

Nineteenth Level Spells

Devouring Sphere

Conjuration, Evocation, Transmutation

Components: V, S, M (a black pearl worth 1000 GP)

Range: Medium (100 ft + 10 ft/Level)

Duration: 10 minutes per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You create a self-guided Sphere of Annihilation, with an animal-like sentience, which will follow your orders to the letter. It moves at 30' per round and has a similar range to project itself as a touch attack (+5 attack bonus). While it possesses Spell and Power Resistance 35 versus mind-affecting spells and psionic powers, it can be affected by mental attacks. Otherwise it's impervious to magic and physical attacks that wouldn't affect a normal Sphere of Annihilation.

Dragon-Bond

Conjuration, Necromancy

Range: Close (25 ft + 5 ft/Level)

Duration: Permanent

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

Dragon-Bond links the lives of two target creatures together so that they pool their hit points, can each share 48 CP worth of abilities with the other, can share senses, and can use abilities or spells on or through each other as needed. Once in place, a *Dragon-Bond* is permanent and irrevocable; killing (or, for that matter, resurrecting) one of the pair does the same to the other. Sadly, the one with the higher base Will save always dominates the pairing; the other will automatically give in to the dominant partner's plans.

Grim

Conjuration, Evocation, Transmutation

Range: LOS

Duration: One hour per level (D)

Casting Time: One Standard Action

Saving Throw: See text

Spell Resistance: No

You create a hellish sentient storm. This has all the effects of a *Storm of Vengeance* each round, poisons all those within it or exposed to it as per *Cloudkill*, travels at 60 feet per round (and can "run"), and is self-directing. It

can be sent in pursuit of a group, to attack a city, or on some other simple mission, which it will do its best to fulfill. Fortunately, it cannot travel more than 200 miles from its creator.

Historical Revisionist

Divination, Enchantment, Transmutation
Components: V, S, M (a history book modified to show the desired version of events)
Range: Emanates from the caster
Duration: Permanent
Casting Time: One Standard Action
Saving Throw: Will partial
Spell Resistance: No

You subtly alter memories, records, and physical evidence to erase or insert specific "facts" of history. This initially affects a radius of 20 miles per level, but tends to slowly spread over time. Note that the caster is not immune to this affect and may come to believe it over time. Those who make their saving throw retain hazy memories or a suspicion that the commonly accepted version of history is incorrect, but are rarely entirely clear on what did happen.

Lifemaker

Necromancy, Enchantment, Illusion
Range: Touch
Duration: Instantaneous
Casting Time: One Standard Action
Saving Throw: None
Spell Resistance: No

You may create arbitrary lifeforms from your own blood. For every 1 hit point you spend, you may create a

Many people underestimated Marie. Who knew that the doll was actually a spellform?

creature with another hit die, or add a hit die to any creature so created. These hit points can be regained only with rest and time, not magic. The creatures created in this fashion are friendly, but are not always obedient.

Only genuinely living creatures of flesh and blood can be created in this fashion; elementals, outsiders, and constructs cannot be fashioned with *Lifemaker*.

Facilitation

Abjuration, Conjunction, Divination, Evocation, Enchantment, Illusion, Necromancy, Transmutation
Range: Medium (100 ft + 10 ft/Level)
Duration: Permanent
Casting Time: Ritual
Saving Throw: None
Spell Resistance: No

Choose a laboratory, shrine, or other research center. Any and all alchemy, spell research, or item creation carried out there costs half the usual price (in experience and wealth), is completed in one-quarter the usual time, and enjoys a +10 circumstance bonus on any relevant rolls.

Penultimate Shield

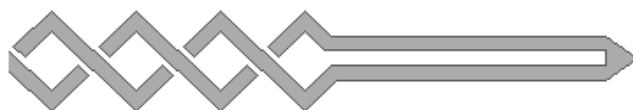

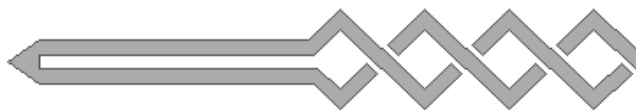

Divination, Evocation
Components: S
Range: LOS
Duration: Instantaneous
Casting Time: One Immediate Action
Saving Throw: None
Spell Resistance: No

This spell cancels any attack, single-target or area, automatically except for the Gravitational Soliton spell. Casting this spell is instantaneous and may be done reflexively even if you have no actions to take.

Photon Transformation

Illusion, Transmutation
Components: V
Range: Touch
Duration: One minute per level (D)
Casting Time: One Standard Action
Saving Throw: Fortitude negates
Spell Resistance: No

The target becomes a being of pure energy and can fly at anything up to lightspeed, take five times the usual number of actions per round, shift up and down the frequency scale at will, and move through solids and liquids. He or she can generate 16d6 fire-based ranged touch attacks with a 400 ft range increment at will or blast 20 ft radius areas with 8d6 at the same range (these are in no way magical and no save applies). The target need not breathe, eat, or drink, and is considered incorporeal in this state. The user can be reflected by mirrors, cannot penetrate darkness-based effects of 8th level or above, and can get lost awfully easily if they actually do opt to approach any significant fraction of lightspeed.

Shadow Castle

Conjuration, Evocation, Illusion

Range: None

Duration: Permanent (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You shape a castle from one of the following forces: shadow, light, fire, water, earth, air, cold, acid, positive energy, or negative energy (or any other the GM lets you get away with). The castle lasts as long as you live and you may freely alter the floorplan and generate any cantrip, first, or second level spell related to the energy type at will while inside. The spell slot used to cast it remains occupied until the castle is dismissed.

Ultimate Defeat

Abjuration, Necromancy

Range: See text

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

When cast at the site of the defeat of a foe, it undoes the lingering effects of his or her accomplishments, powers, and successes. This may take millennia to finish and doesn't necessarily affect similar powerful characters who may be allied with or share the same goals at the defeated one.

Twentieth Level Spells

Annihilus Strike

Abjuration, Conjuration, Evocation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

Combining an anti-matter strike with a spherical *Gate*, Annihilus Strike deals 2500 damage to everything in a 10' radius of effect.

This is almost the upper limit as far as damage goes. It's possible to go higher, but that risks runaway total-conversion reactions or ripping a hole in the universe. And if 2500 non-magical no-save damage doesn't cut it, you probably need to rethink your strategy anyway.

Army of the Dead

Conjuration, Necromancy

Range: Long (400 ft + 40 ft/Level)

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

This raises up a horde of undead (5,000 total hit dice

to start with, anything up to CR 16. This may expand rapidly when the undead start killing people) and transforms the caster into a Lich, if desired, to lead them. The caster completely controls the undead and they are treated as having a minimum Intelligence of 10, regardless of their actual Intelligence, when it comes to obeying orders, carrying out military operations and procedures, and making stereotypical remarks.

Blood Wreaking

Conjuration, Transmutation

Range: Touch

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

The target may create a magic item or items directly, without resorting to any special techniques or feats. Items created with this spell cost twice the base experience point cost, but have no GP cost. The caster may choose to create up to (Cha Mod +1) items when the spell is cast.

Genesis Wave

Evocation, Necromancy, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Fortitude partial

Spell Resistance: Yes

You deal 40d6 damage to everything within a 50 ft radius per Caster Level. Destroyed items and creatures are refashioned according to your whims into any objects you desire, or into creatures assuming the total hit dice remains the same or less. Those who make the Fortitude save take only 30d6 damage and are not subject to the reshaping effect if killed.

Grand Awakening

Conjuration, Enchantment, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

This spell awakens something. The mighty spirit of a volcano or forest. Dormant deities. A swarm of plant and animal spirits. The sleeping dead of an ancient battlefield (not necessarily as undead; they may turn up as positive-energy spirits, as psychic haunts, or simply return to life). A burned-out sun. The latent consciousness of the world.

All such creatures, if not already sentient, become so as per the *Awakening* spell. They are generally friendly, at least at first, and can usually be talked into doing something for the caster. After that, however, they tend to simply "do their thing" - which may or may not cause problems. Awakening a volcano may disrupt the

geography and start the formation of whole mountain ranges you didn't want.

On a less grandiose note, the spell can be used to animate a golem or other construct of up to CR 16 with no preliminaries, to raise the dead, to activate latent powers (in settings featuring such things), to raise a character to level five, or simply to trigger physical events such as volcanic eruptions.

Heritage

Evocation, Enchantment, Illusion

Range: Personal

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You grant 1d2 CP per caster level from any ability you have to your descendants for generations to come. This fades over time if careful breeding is not ensured, but an occasional lucky and powerful child will emerge even centuries after the casting.

Iron Heart

Conjuration, Illusion, Transmutation

Range: Medium (100 ft + 10 ft/Level)

Duration: One day per level (D)

Casting Time: One Standard Action

Saving Throw: Fort negates

Spell Resistance: Yes

The target gains all the special abilities and traits (but not the vulnerabilities or limitations) of an Iron Golem, a +20 alchemical bonus to his or her Strength, and 150 additional hit points.

Phoenix Wings

Conjuration, Evocation, Enchantment

Components: V

Range: Touch

Duration: 1 Round or 3 Months, depending on your point of view

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

The target may take three months off in a pleasant, well-stocked private pocket dimension (beachfront property is favored with this spell) while only 1 round passes outside. During this time the caster may heal up, engage in spell research, memorize new spells, make magical items, and otherwise do what he or she pleases. Sadly, casting this spell requires the expenditure of 10,000 experience points.

Sarthim's Evasion

Conjuration, Evocation, Transmutation

Range: Personal

Duration: 10 minutes per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You are considered to be out of range for any effect beneath Line of Sight range. This includes ranged weapon attacks but does not apply to your attacks; you can throw daggers or short-range spells at people while remaining out of range of their longbows.

The L24 version extends to melee attacks.

Sphere of Circumstance

Divination, Enchantment, Evocation

Range: Extreme (800 ft + 80 ft/Level)

Duration: 10 minutes per level (D)

Casting Time: One Standard Action

Saving Throw: Will negates

Spell Resistance: Yes

You gain a +20 circumstance bonus on all saves, attack checks, and skill rolls. Your allies within a 30' radius gain +10 on all of those, and your foes face a -10 penalty.

Twenty-First Level Spells

Boundless Sea of Flames

Conjuration, Evocation

Range: LOS

Duration: 5 rounds (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You unleash a vast flood of force from the elemental planes dealing 3d6 damage per round for five rounds to everything in a small continent-sized area (no, we are not going to give an exact scale). Despite the name, the spell is not limited to flame; it can flood, blow everyone about, or cause awesome earthquakes. Vicious casters might use a massive rain of acid. Of course, there probably aren't any non-vicious casters of this spell.

Demiplane Creation

Conjuration, Evocation, Transmutation

Range: Transdimensional

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You create an astral or ethereal realm of arbitrary size and complexity to your whim, complete with plants, animals, and even sentient beings (or constructs and free-willed spells, if you like). You determine natural, magical, and physical law within the realm.

This is generally limited to a few solar systems or modest star cluster. If you want a galaxy or two, you'll have to use a L24 variant.

Euclidean Revocation

Abjuration, Conjunction, Evocation

Range: Emanation from caster

Duration: 10 minutes per level (D)

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You may warp distance in a 50' radius around you at will by a maximum factor of 1000. This can be incredibly annoying; people attacking you with ranged weapons can now face a distance of at least 50,000', at which point even the best archers are rather unlikely to hit. This does not have to be consistent; if you want to have Joe be 500 feet from Fred from Joe's point of view, Fred may still be within arms reach of Joe from his point of view. Worse, you can change such adjustments at whim whether or not it's your action.

Forbidden Lore

Divination,
Enchantment,
Necromancy

Range: See text

Duration: Permanent (D)

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You can attach any curse you can cast or inflict to an idea, symbol, or piece of knowledge. Anyone who has that information, entertains that idea, or knows or sees the symbol will be affected. Victims may opt to forget the idea or knowledge or to forsake and destroy the symbol rather than face the curse. Either way, this is a wonderful way to enforce silence or forgetfulness on a subject or a penalty on an enemy force.

The Grand Muster

Conjunction, Divination

Range: See text

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You may summon up to 100,000 individual beings loyal to you from anywhere, even if they are not together or even on the same plane as you or each other.

Great Foreseeing

Divination, Enchantment, Evocation

Range: Touch

Duration: Instantaneous or one minute per level

Casting Time: Ritual or 1 Standard Action (see below)

Saving Throw: None

Spell Resistance: No

As a ritual spell, the target may scan through possible future timelines, and may therefore learn of probable threats, interference, complications, and disasters. This will give general information about almost any future event. It remains somewhat unreliable, since there are a limitless number of possible futures and a limited amount of time to scan them in.

If used as an immediate spell, the target gains a +20 insight bonus on AC, saves, skills, and attacks for one minute per level.

Molecular Mastery

Divination, Enchantment,
Transmutation

Range: Short (25 ft + 5 ft/2 Levels)

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You arbitrarily change the form and properties of matter, affecting up to 1 ton of material per level. You can create any matter you can imagine and the GM will let you get away with.

Seal of Eternity

Abjuration, Enchantment,
Transmutation

Range: See text

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

A chosen spell you just cast or cast immediately after using this spell becomes effectively unbreakable and irreversible at the permanent cost of 2 attribute points, 12 CP, or two spell slots equal to the spell used. While breaking such a spell is theoretically possible, it's also a good multimillennial project for a god.

Stars like Dust

Conjunction, Evocation, Illusion

Range: LOS

Duration: Instantaneous

Casting Time: One minute

Saving Throw: None

Charisma? Bathing?

A Barbarian craves not these things.

Spell Resistance: No

You summon and contain a mass of fusing hydrogen. This can provide heat and light for a radius of 150 miles quite well and lasts 1 year per level. More martial uses include flinging it at an enemy, which causes 2000 points of fire damage to everyone in a 12 mile radius in a multimegaton blast, projecting 1d4+1 plasma flares each capable of doing 1000 points of fire damage in a 100 foot radius with LOS range, or projecting up to 100 40d6 plasma bolts at individual targets with LOS range. While the 40d6 bolts still cause 20d6 damage in a 30 foot radius of their targets, they're far more controlled than anything else you can do with this monstrosity.

Twenty-Second Level Spells

Ban of Heaven

Abjuration, Enchantment, Transmutation

Range: See text

Duration: Permanent

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

A particular spell or ability stops working permanently on a global basis. Alternatively, the caster may simply ban the advancement or the development of a particular ability, or may simply keep anyone from gaining it after the spell is cast.

Call the Assembly

Divination, Enchantment, Illusion

Range: See text

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

This spells calls a universal vote in which all sentient beings unconsciously receive a vote on the structure, natural laws, and organization of the universe. The majority rules regardless of the wishes of any gods, great powers, or creator deities.

Perhaps fortunately, most sentient beings are fairly conservative at heart.

Rejuvenate Star

Evocation, Necromancy, Transmutation

Range: None

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

The complex heavy elements in a star revert back to hydrogen, while the magic keeps the star stable. This counters *Destabilize Star*, below.

While much the same thing could be accomplished with The Great Awakening, that spell could also trigger

a nova, is extremely unpredictable, and would likely leave the star as a sentient, self-willed, entity. This spell is much, much, safer.

Temporal Reversal

Abjuration, Evocation, Transmutation

Range: None

Duration: Concentration

Casting Time: One Standard Action

Saving Throw: None

Spell Resistance: No

You rewind time at one to ten times normal speed in a 30' per level radius. This doesn't affect the minds of anyone present, but will cancel all effects of combat and replenish any magic items, spells, or abilities which were used up in the rewind period. Note that, while this spell causes things to revert to previous states, it does not affect items which are not currently present. If someone stole a precious manuscript ten hours ago, you cannot rewind time until they walk backwards into the area and put it back; neither the thief nor the manuscript are present to be affected. If the thief and manuscript had been burned to ashes by a trap, that would be another matter entirely.

Unrelenting Glacial Advance

Conjuration, Evocation

Range: None

Duration: 100,000 Years

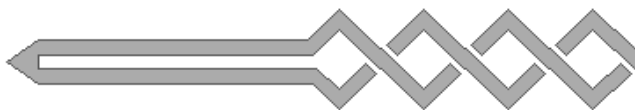

Casting Time: Ritual

Saving Throw: None

*I'd like to show you a little trick
Mother taught me once while
you were out being evil.*

**Spell Resistance:** No

You cause an ice age or other major climactic shift. Cooling would become noticeable in a few weeks, much of the winter snow would fail to melt when spring came next year, and full-scale glaciation will be well underway in a few years.

Twenty-Third Level Spells

Destabilize Star

Evocation, Enchantment, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

The targeted star is diverted off main sequence, with the potential for becoming a red giant or supernova, or dropping into dwarf status. This usually takes several years to really start taking effect, and may not be complete for a hundred thousand. The process can usually be interrupted in the early stages, but after a few years the changes in the core may be complete. They just won't be visible from the outside for a bit.

Extinction

Divination, Necromancy

Range: See text

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Fortitude partial

Spell Resistance: No

Select a specific species or subspecies. All creatures of that type across the world must save or die. Those who do make the save take 6d6+40 damage. This will reduce almost any living species to much less than 1% of its previous number, and the remainder will often be unable to find mates ever again, resulting in the titular extinction.

Note that any magical ward capable of holding off a sixth level spell will suffice to block the effects of *Extinction*. Most of the spell's power goes to increasing the area affected rather than into the death effect.

Lair of Dreams

Enchantment, Evocation, Illusion

Range: See text

Duration: See text

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Lair of Dreams causes an aspect of the user's psyche to intrude on the physical world in the form of a dungeon, structure, or area of wilderness. The user may cut the link at any time in theory, but rarely this turns out to be impossible or simply doesn't cause the *Lair of*

Dreams to vanish. A few users have been kidnapped by powerful creatures from the depths of their subconscious who don't want to vanish with the spell. Abductees wind up being stashed in cold storage in the depths of their own creations. It differs with every caster and with what part of the mind is involved, although most *Lairs* have as many levels as their creator.

Why cast it? Well... characters venturing inside may be able to fix psychological problems, remove pesky invasive mental attacks, or ferret out long-forgotten secrets. It's an unequalled defensive stall ("To reach me you must penetrate the 15th level of the Lair of Dreaming Shadows!"). It can even be a resource and a source of strange minions. After all, many people live inside their own heads, but how many of them can move the furniture?

Orbital Adjustment

Evocation, Transmutation

Range: LOS

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You arbitrarily change the course of major celestial objects, at least within the local solar system. You may summon comets, change the lunar phase, and start moving your solar system out of the galaxy among other ridiculously impressive feats. Note: this may result in a hideously awful climate change and/or the death on all life. Please be careful when employing celestial objects as melee weapons.

Ultimate Unity

Abjuration, Conjunction

Range: See text

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

Ultimate Unity merges pocket dimensions together, or grafts a pocket dimension onto a large universe. This may cause catastrophic instabilities and shifts in natural laws.

Twenty-Fourth Level Spells

Armageddon

Conjuration, Divination, Evocation

Range: See text

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

The destined End of the World, if there is one for this particular realm, begins. This may still be halted by great heroes on an epic quest to save the world. It does not function on worlds with no overly dramatic predestined end.

Fork of Time

Abjuration, Divination, Evocation

Range: LOS

Duration: Instantaneous

Casting Time: One Immediate Action

Saving Throw: None

Spell Resistance: No

You may make a decision in two ways and observe the result for up to three days, before deciding which timeline to make real.

The Passing of the Age

Abjuration, Conjuration, Illusion

Range: See text.

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

You bar major intervention by the gods. Divine magic will slowly fade. Each god may leave a few relics, choose an occasional champion, and tinker in minor ways, but the destiny of the world is now in the hands of mortals.

Note that trying this spell without the permission of a substantial proportion of the gods generally results in dying before the completion of the ritual, unless the caster is already capable of withstanding the wrath of the local gods or they're so self-involved that they don't notice. Most sages suggest offering the Gods excellent retirement packages first.

Back in my day, we didn't have spells! And even the gods had to walk five miles in the snow...

Temporal Halt

Abjuration, Conjuration

Range: Long (400 ft + 40 ft/Level)

Duration: Instantaneous

Casting Time: One Standard Action

Saving Throw: Ref negates

Spell Resistance: No

The target simply stops in time, permanently left in the past. From the point of view of everyone else, he, she, or it simply vanishes totally. Countering this spell requires that someone (presumably a powerful spellcaster) know when and where *Temporal Halt* was cast, on whom or what, and then must find a way to cast a spell into the past. Obviously, this won't happen very often.

The Thousand Excellent Herbs

Conjuration, Enchantment, Transmutation

Range: Affects any single country or province on the planet

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: None

Spell Resistance: No

This spell causes 100,000 doses of plants, each type of which contains the effects of a random but useful (to the eater) spell of level 1-3, to grow o'er the land. Patches near magical power nexi, blessed temples, or other sources of magical energy may continue to regrow each year indefinitely.

Walk the Dark Lands

Schools: Enchantment, Evocation, Necromancy

Range: Touch

Duration: Instantaneous

Casting Time: Ritual

Saving Throw: Will negates

Spell Resistance: Yes

The target transcends flesh and blood and may move freely between physical and spiritual realms and manifest a body as required, in any shape you please. If blown up or otherwise destroyed, the target can create a new body in 1d6 hours.

Theoretically there may be spells of still higher level. Of course, at this point, most characters are going to be hitting the limits of their imaginations, if not their power (and the patience of the Game Master). Will they even be able to think of anything that calls for a higher-level spell?
